Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance from certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Virginia & Truckee Railroad

[Waiver Petition Docket Number FRA-2010-0093]

The Virginia & Truckee Railroad (V&T) petitioned FRA for relief from the requirements of 49 CFR 215.203 *Restricted Cars*, for five pieces of freight equipment used in tourist/excursion service and the associated stenciling as required under 49 CFR 215.303.

V&T is a tourist, excursion, or educational railroad operating between Virginia City and Carson City via Gold Hill, Nevada. The railroad was relayed after having been removed at the conclusion of commercial operations. The railroad operates an average of seven round trips between Virginia City and Gold Hill Depot, NV, per day, May through October. They also operate three trains between Carson City to Virginia City, NV, Saturday & Sunday May through October, with special trains scheduled in November. The maximum operating speed for the entire railroad is 20 mph.

All of the freight equipment referenced in the petition is operated by V&T on a non-insular, not part of the general system of transportation railroad. The railroad line is not connected to the general system at either end, but has public highway crossings at grade. This Special Approval shall apply only to the following five cars: V&T 50, V&T 55, V&T 54, V&T 123, and V&T MW 124, owned and operated by V&T. A consolidated list of the equipment and the prohibited components was provided as an attachment to their petition.

These freight cars were either converted to passenger excursion cars, or used in conjunction with their tourist/excursion operation, none carry freight. Some of the equipment is used for photographic subjects in an educational setting to depict the type of freight trains that would have operated in the era during mining operations. Therefore, stenciling the required information on the equipment would not be consistent with the educational setting that the railroad strives to depict. Therefore, the railroad seeks relief from the requirements to stencil the equipment indicating the restricted components. There have been no derailments or other safety issues with the operation of the equipment, nor their prohibited components. As stated by V&T, loss of use of this equipment would cause the railroad to cease operations.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.
