The USDA-ARS used and coordinated the NEPA commenting process to satisfy the public involvement process for Section 106 of the National Historic Preservation Act (16 U.S.C. 470(f) as provided for in 36 CFR 800.2(d)(3)). During the public comment period, USDA-ARS received two public comments regarding the transfer of lands and facilities from USDA-ARS to FAMU. None of the public comments received identified any substantial evidence regarding significant environmental impacts resulting from the proposed land transfer.

Based on its analysis of the Final EA for the property transfer, USDA-ARS has found that the transfer of properties could have adverse effects on previously identified historic properties. USDA-ARS, Florida Division of Historical Resources (FLDHR) and FAMU have signed a Memorandum of Agreement (MOA) to address the adverse effects from the proposed transfer and to avoid, minimize, or mitigate the adverse effects to any previously identified historic properties. The MOA also stipulates a Programmatic Agreement (PA) between FAMU and FLDHR for the long-term management of historic properties on the conveyed parcels; the PA will establish a consultation process that mirrors Section 106 and continue consultations with the FLDHR and the Seminole Tribe of Florida on Native American sites located on the properties. With the implementation of the MOA to address adverse effects on historic properties, there would be no significant impact to the environment from transferring approximately 3,800 acres of land and facilities at the USDA-ARS STARS in Brooksville, Florida, to the Board of Trustees of the Florida Agricultural and Mechanical University, for use by FAMU. Therefore, USDA-ARS will not prepare an Environmental Impact Statement for this proposed action.
