FOR FURTHER INFORMATION CONTACT: Lawrence Burns by telephone at (202) 693-3141 (this is not a toll-free number) or by email at Burns.Lawrence@dol.gov.

SUPPLEMENTARY INFORMATION: DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The federal-state UI program is a required partner in the comprehensive, integrated workforce system. Individuals who have lost employment through no fault of their own and have earned sufficient wage credits may receive UI benefits if they meet initial and continuing eligibility requirements. Since 2005, one of the ways that the Department and participating state UI agencies have been addressing individual reemployment needs of UI claimants and working to prevent and detect UI improper payments is through the voluntary UI Reemployment and Eligibility Assessment (REA) program. Beginning in FY 2015, states transitioned from REA to the voluntary RESEA program.

The Bipartisan Budget Act of 2018, Public Law 115-123 (BBA), enacted on February 9, 2018, included amendments

to the Social Security Act (SSA) creating a permanent authorization for the RESEA program. The RESEA provisions are contained in Section 30206 of the BBA, enacting new section 306 of the SSA. Section 306(e), SSA, provides the authorization and specific requirements for an annual RESEA state plan. To receive an RESEA grant, a state must submit an annual RESEA state plan that responds to all required elements and is approved by the Secretary of Labor. In 2019, ETA developed this state plan data collection to closely align with the statutory annual report requirements detailed in Section 306(3), SSA, and the essential administrative information necessary to complete the review, execution, and oversight of RESEA grants. ETA proposes to renew this data collection with several revisions intended to reflect recent changes to the RESEA program, to remove elements that are no longer routinely used to support grant management, and to provide states with the opportunity to include additional narrative descriptions that more fully reflect the state's planned RESEA activities and the economic or other factors that the state considered during the planning process. These proposed revisions include:

- Narrative boxes will be added to plan elements to allow states to provide additional information, clarifications, or other information relevant for the Department's wholistic review of planned RESEA activities;
 - All response length limitations will be removed;
 - Elements related to service delivery strategies will be revised to reflect recent program changes that allow for virtual and remote services;
 - Information about administrative and staff-costs associated with specific RESEA services will no longer be collected; and
 - To support the fiscal year 2023 implementation of section 303(c)(2), SSA, which requires states to devote a specific percentage of their RESEA funding to evidence-based components with a high or moderate causal rating that show a demonstrated capacity to improve employment and earnings outcomes for program participants, elements identifying planned evidence-based components will be revised to include funding-level information.
- 42 U.S.C. 506(e) authorizes this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is
