

alternatives to the proposed Plan may include the following: (1) A "no action" alternative in which the requested ITP would not be issued and the conservation measures in the proposed new HCP would not be implemented; (2) an alternative that would focus on northern spotted owls and that would not include deadwood management and other habitat management efforts intended primarily to provide conservation benefits to the fisher; (3) an alternative that would include other species as covered species, with appropriate habitat management for them; (4) an alternative that would not include measures to manage barred owls; and (5) an alternative that would not utilize dynamic core areas but would instead maintain the static set-aside approach from the 1992 NSO HCP/ITP.

We invite comments and suggestions from all interested parties to ensure consideration of a full range of reasonable alternatives related to development of the EIS, and that all significant issues are identified. We request that comments be as specific as possible, and that comments include information and concerns regarding the following issues:

- (1) The direct, indirect, and cumulative effects that implementation of any reasonable alternatives could have on endangered and threatened species and their habitats;
- (2) Other reasonable alternatives consistent with the purpose of the proposed new HCP as described above, and their associated effects;
- (3) Measures that would minimize and mitigate potentially adverse effects of the proposed action;
- (4) Baseline environmental conditions in and adjacent to the covered lands;
- (5) Adaptive management or monitoring provisions that may be incorporated into the alternatives, and their benefits to listed species;
- (6) Other plans or projects that might be relevant to this action; and
- (7) Any other information pertinent to evaluating the effects of the proposed action on the human environment.

The EIS will analyze and document the effects that the considered alternatives would have on spotted owls, fishers, and any other species, as well as other components of the human environment, including but not limited to cultural resources, social resources (including public safety), economic resources, water and air quality, global climate change, and environmental justice.

Please direct any comments to the USFWS contact listed above in the **ADDRESSES** section, and any questions to

the USFWS contact listed in the **FOR FURTHER INFORMATION CONTACT** section.
