The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's "Regulatory Guide" series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

This DG, titled "Monitoring Criteria and Methods to Calculate Occupational Radiation Doses," is temporarily identified by its task number, DG-8060.

The DG is a proposed Revision 1 to RG 8.34 (ADAMS Accession No. ML21068A160). The proposed revision of RG 8.34 (Revision 1) describes acceptable methods for calculating the total effective dose equivalent. Revision 1 also provides acceptable methods for:

- Performing prospective dose evaluations,
- monitoring of unintended doses,
- monitoring dose from hot particles,
- assessing dose from wound injuries,
- calculating soluble uranium intakes, and
- processing of dosimetry devices.

On October 25, 2013 (78 FR 64030), the NRC staff issued DG-8031, "Monitoring Criteria and Methods to Calculate Occupational Radiation Doses," (ADAMS Accession No. ML13168A095), for public comment. DG-8031 was the proposed Revision 1 to RG 8.34. The NRC staff has elected not to finalize DG-8031 and is issuing DG-8060 as a replacement. The staff notes that DG-8060 considers and addresses technical issues and public comments related to the issuance of DG-8031.

The staff is also issuing for public comment a draft regulatory analysis (ADAMS Accession No. ML21068A161). The staff develops a regulatory analysis to assess the value of issuing or revising

a regulatory guide as well as alternative courses of action.

III. Backfitting, Forward Fitting, and Issue Finality

DG-8060, if finalized, would not constitute backfitting as defined in sections 50.109, 70.76, 72.62, or 76.76 of title 10 of the *Code of Federal Regulations* (10 CFR), all titled "Backfitting," and as described in NRC Management Directive (MD) 8.4, "Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests" (ADAMS Accession No. ML18093B087); would not affect the issue finality of any approval issued under 10 CFR part 52, "Licenses, Certificates, and Approvals for Nuclear Power Plants"; and would not constitute forward fitting as that term is defined and described in MD 8.4. As explained in DG-8060, applicants and licensees are not required to comply with the positions set forth in DG-8060.
