SUPPLEMENTARY INFORMATION: This DEIS/DEIR is a revised and updated version of a DEIS/DEIR for the Coachella Canal Lining Project filed by Reclamation and the CVWD and issued for public comment on January 11, 1994. At that time, because of funding constraints, construction of the project was deferred, and a Final EIS/EIR was not completed. The proposed action evaluated in the revised DEIS/DEIR is the same as in the previous document—to install a concrete lining within the existing cross-section of unlined portions of the canal (33.2 miles) using conventional construction methods and diverting water around each section while it is being lined. Alternatives evaluated in the DEIS/DEIR, also the same as in the original DEIS/DEIR, include No Action, Underwater Lining, and Parallel Canal Construction.

The purpose of this federal action is to conserve 30,850 acre-feet annually of water presently being lost as seepage from the earthen reaches of the Coachella Canal. A specific quantity of conserved water would be assigned to the Department of the Interior to facilitate implementation of the San Luis Rey Indian Water Rights Settlement Act (Public Law 100-675, November 17, 1988). Remaining quantities of conserved water would be distributed to southern California to meet present water demand and to assist the State in attaining the goals of California's Colorado River Water Use Plan. The federal action includes approval of transfers and exchanges of conserved Coachella canal water among California's Colorado River water contractors.
