

Act of 1993 (GPRA), the Department has established three performance measures for the Vocational Rehabilitation Services Projects for American Indians with Disabilities program. The measures are (1) the percentage of individuals who leave the program with an employment outcome, (2) the percentage of projects that demonstrate an average annual cost per employment outcome of no more than \$35,000, and (3) the percentage of projects that demonstrate an average annual cost per participant of no more than \$10,000. Each grantee must annually report its performance on these measures through the Annual Progress Reporting Form for the American Indian Vocational Rehabilitation Services (AIVRS) Program.

In addition, this program is part of the Administration's job training and employment common measures initiative. The common measures for job training and employment programs targeting adults are—entered employment (percentage employed in the first quarter after program exit); retention in employment (percentage of those employed in the first quarter after exit that were still employed in the second and third quarter after program exit); earnings increase (percentage change in earnings pre-registration to post-program and first quarter after exit to third quarter after exit); and efficiency measure (annual cost per employment outcome and per participant). The Department is currently working toward implementing these common measures. Each grantee will be required to collect and report data for the common measures when implemented.

SUPPLEMENTARY INFORMATION:

Title: Voting System Test Laboratory Accreditation Program Manual.

OMB Number: Pending.

Type of Review: Regular submission.

Needs and Uses: Section 231(b) of the Help America Vote Act (HAVA) of 2002 (42 U.S.C. 15371(b)) requires that the EAC provide for the accreditation and revocation of accreditation of independent, non-federal laboratories qualified to test voting systems to Federal standards. Generally, the EAC considers for accreditation those laboratories evaluated and recommended by the National Institute of Standards and Technology (NIST) pursuant to HAVA Section 231(b)(1). However, consistent with HAVA Section 231(b)(2)(B), the Commission may also vote to accredit laboratories outside of those recommended by NIST upon publication of an explanation of the reason for any such accreditation. In

order to meet its statutory requirements under HAVA Section 15371(b), the EAC has developed the EAC's Voting System Test Laboratory Accreditation Program. The procedural requirements of the program are established in the proposed information collection, the EAC *Voting System Test Laboratory Accreditation Program Manual*. Although participation in the program is voluntary, adherence to the program's procedural requirements is mandatory for participants. The procedural requirements of this Manual will supersede any prior laboratory accreditation requirements issued by the EAC. This manual shall be read in conjunction with the EAC's *Voting System Testing and Certification Program Manual* (OMB 3265-0004).
