

collection are necessary to prevent regulatory uncertainty with respect to VMES and other satellite services that operate in the Ku-band within the United States. Prior to this rulemaking, the lack of rules for VMES posed an administrative burden on those entities attempting to provide VMES-type services and on Commission staff because such services could be granted only through the use of waivers and Special Temporary Authority (STA) authorizations for a six-month period of time. The approval of fifteen-year licenses for VMES operators significantly reduces the burden imposed upon both licensees and Commission staff who review and approve the waivers and STAs. Furthermore, without such information the Commission would not be able to take the necessary measures to prevent harmful interference to satellite services from VMES. Finally, the Commission would not be able to advance its goals of managing spectrum efficiently and promoting broadband technologies to benefit American consumers throughout the United States.
