**Natural Gas Price Formation; Notice of Staff Technical Conference & Workshop on Energy Price Discovery & Indices**

May 29, 2003.

The Federal Energy Regulatory Commission (FERC) will hold a technical conference on Tuesday, June 24, 2003, at FERC headquarters, 888 First Street, NE., Washington, DC, in the Commission Meeting Room (Room 2C). The Commodity Futures Trading Commission (CFTC) and the National Association of Regulatory Utility Commissioners (NARUC) are participating.

At an April 24, 2003, conference on Natural Gas Price Formation in this docket, Commission staff explored issues relating to the sufficiency of currently collected and published natural gas price information. Authenticity and reliability of the data and adequacy of coverage were discussed. At the upcoming conference we intend to weigh options and facilitate solutions that would ensure accurate, transparent and reliable gas and electric price indices.

We seek consensus on the best near-term option that will satisfy public policy goals in a timely, effective and efficient fashion. The discussion will be focused on comparing the merits of various options, including industry solutions and solutions involving regulatory or self-regulatory oversight, and what would be required to implement each option. Staff plans to issue an options paper in this docket and on the Commission's Web site by June 13. To advance public understanding of the options, the conference will include panelists to explain some of the less familiar options such as Self-Regulating Organizations (SROs) and audited data hubs.

This one-day meeting will begin at 9 a.m. and conclude about 5 p.m. All interested parties are invited to attend. There is neither a registration fee nor preregistration to attend this conference.

We look forward to an informative discussion of the options and a determination of which would best provide all participants in the market clear, transparent, dependable, and accurate price signals with which to make informed decisions.

## DEPARTMENT OF ENERGY

### National Nuclear Security Administration

#### Notice of Availability of the Draft Supplemental Programmatic Environmental Impact Statement on Stockpile Stewardship and Management for a Modern Pit Facility

**AGENCY:** National Nuclear Security Administration, Department of Energy.

**ACTION:** Notice of availability.

**SUMMARY:** The Department of Energy's (DOE) National Nuclear Security Administration (NNSA) is responsible for the safety and reliability of the U.S. nuclear weapons stockpile, including production readiness to maintain that

stockpile. Since 1989, the DOE has been without the capability to produce certified plutonium pits, which are an essential component of nuclear weapons. The NNSA, the Department of Defense, and Congress have highlighted the lack of long-term pit production capability as a national security issue requiring timely resolution. While a small interim capability is currently being established at the Los Alamos National Laboratory (LANL), classified analyses indicate that long-term support of the nuclear stockpile, which is a cornerstone of U.S. national security policy, will require a long-term pit production capability. Accordingly, the NNSA has prepared a Draft Supplement to the Programmatic Environmental Impact Statement (EIS) on Stockpile Stewardship and Management (SSM) for a Modern Pit Facility (MPF) [hereafter, that document will be referred to as the MPF Draft EIS], which is now available, in order to decide: (1) Whether to proceed with the MPF; and (2) if so, where to locate the MPF. This Notice of Availability also sets forth the dates, times, and locations for public meetings on the MPF Draft EIS.

**DATES:** NNSA is inviting comments related to the MPF Draft EIS. Comments should be submitted by August 5, 2003, and will assist the NNSA in finalizing the MPF Draft EIS. Comments submitted after August 5, 2003 will be considered to the extent practicable. Public meetings to discuss issues and receive comments on the MPF Draft EIS will be held in the vicinity of sites associated with the proposed action, as well as in Washington, DC. The public meetings will provide the public with an opportunity to present comments, ask questions, and discuss issues with NNSA officials regarding the MPF Draft EIS. The locations, dates, and times for these public meetings are as follows:

Pantex Site—June 26, 2003, 7 p.m.–10 p.m., College Union Building, Oak Room, Amarillo College, Washington Street Campus, 24th and Jackson Streets, Amarillo, TX 79178, (806) 371-5100.

Carlsbad Site, NM—June 30, 2003, 6 p.m.–10 p.m., U.S. Department of Energy, Carlsbad Area Office, 4021 National Parks Highway, Carlsbad, NM 88220, (505) 234-7227.

Los Alamos Site—July 1, 2003 7 p.m.–10 p.m., Cities of Gold Hotel, Highway 84/285, Pojoaque, NM 87544, (505) 455-0515.

Nevada Site—July 2, 2003, 7 p.m.–10 p.m., University of Nevada Las Vegas, 4505 Maryland Parkway, Student Union Building, Room 201, Las Vegas, NV 89154, (702) 895-4449.

Savannah River Site—July 7, 2003, 6 p.m.–10 p.m., North Augusta Community Center, 495 Brookside Avenue, North Augusta, SC 29841, (803) 441-4290.

Washington, DC—July 16, 2003, 10 a.m.–1 p.m., U.S. Department of Energy, 1000 Independence Avenue, SW., Room 1E-245, Washington, DC 20585, (202) 586-5484.

The NNSA will publish additional notices on the dates, times, and locations of the public meetings in local newspapers in advance of the scheduled meetings. Any necessary changes will be announced in the local media.

The MPF Draft EIS also evaluates an upgrade to the plutonium pit manufacturing capabilities currently being established at the TA-55 facility at LANL, and the No Action Alternative of relying on the small interim capability being established at LANL. The MPF Draft EIS evaluates a range of pit production capabilities consistent with national security requirements.
