

until business for the day has been completed.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see www.pcouncil.org). You may send an email to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820-2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Jessi Doerpinghaus, Staff Officer, Pacific Council; telephone: (503) 820-2415.

SUPPLEMENTARY INFORMATION: The primary purpose of this online meeting is to discuss and develop work products and recommendations for the Pacific Council's April 2023 meeting. Topics will include Council process and efficiencies and other items on the Pacific Council's April agenda may be discussed as well. The meeting agenda will be available on the Pacific Council's website in advance of the meeting.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov; (503) 820-2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 3, 2023.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Determination of Overfishing or an Overfished Condition

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: This action serves as a notice that NMFS, on behalf of the Secretary of Commerce (Secretary), has found that the following stocks of fish are now subject to overfishing or overfished: Gulf of Maine haddock, Gulf of Mexico cubera snapper, Gulf of Mexico Jacks Complex, and Gulf of Mexico Mid-water Snapper Complex are now subject to overfishing, and Pacific bluefin tuna, Pacific sardine, Bering Sea snow crab, Saint Matthew Island blue king crab, Southern New England/Mid-Atlantic yellowtail flounder, Gulf of Maine/Georges Bank Atlantic wolffish, Northwestern Atlantic ocean pout, Northwestern Atlantic witch flounder, Atlantic herring, Atlantic halibut, and Georges Bank yellowtail flounder all continue to be overfished. NMFS, on behalf of the Secretary, notifies the appropriate regional fishery management council (Council) whenever it determines that a stock or stock complex is subject to overfishing, overfished, or approaching an overfished condition.

FOR FURTHER INFORMATION CONTACT: Regina Spallone, (301) 427-8568.

SUPPLEMENTARY INFORMATION: Pursuant to section 304(e)(2) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1854(e)(2), NMFS, on behalf of the Secretary, must notify Councils, and publish a notice in the **Federal Register**, whenever it determines that a stock or stock complex is subject to overfishing, overfished, or approaching an overfished condition.

NMFS has determined that Gulf of Maine haddock, Gulf of Mexico cubera snapper, Gulf of Mexico Jacks Complex, and Gulf of Mexico Mid-water Snapper Complex are now subject to overfishing. The Gulf of Maine haddock determination is based on the most recent assessment, completed in 2022 and using data through 2021, which indicates that this stock is subject to overfishing because the fishing mortality rate was above the threshold.

The Gulf of Mexico stocks—cubera snapper, Jacks Complex, and Mid-water Snapper Complex—were not assessed in 2022, so landings data from 2021 were used to support the status determination of subject to overfishing. For each of the Gulf of Mexico stocks or complexes, 2021 landings were greater than their respective overfishing limit. NMFS has notified the New England Council (for haddock) and the Gulf of Mexico Council (for the Gulf of Mexico stocks) of their requirement to end overfishing on these stocks.

NMFS has determined that Pacific bluefin tuna, Pacific sardine, Bering Sea snow crab, Saint Matthew Island blue king crab, Southern New England/Mid-Atlantic yellowtail flounder, Gulf of Maine/Georges Bank Atlantic wolffish, Northwestern Atlantic ocean pout, Northwestern Atlantic witch flounder, Atlantic herring, Atlantic halibut, and Georges Bank yellowtail flounder all remain overfished.

The Pacific bluefin tuna determination is based on the most recent assessment, conducted by the International Scientific Committee for Tuna and Tuna-like Species in the North Pacific Ocean completed in 2022 using data through 2020. Applying domestic status determination criteria, this stock remains overfished because the spawning stock biomass is below its threshold. The Pacific sardine determination is based on the most recent assessment, conducted in 2022 using data from 2021 and supports a determination that the stock remains overfished because the biomass level is below its threshold. NMFS continues to work with the Pacific Council to rebuild these stocks.

The Bering Sea snow crab and Saint Matthew Island blue king crab determinations are based on the most recent assessments, completed in 2022 using data through 2022, which indicate that the stocks remain overfished because the biomass estimates are below their thresholds. NMFS continues to work with the North Pacific Council to rebuild these stocks.

The Southern New England/Mid-Atlantic yellowtail flounder, Gulf of Maine/Georges Bank Atlantic wolffish, Northwestern Atlantic ocean pout, and Northwestern Atlantic witch flounder determinations are based on the most recent assessment, completed in 2022 using data through 2021, which supports the determinations that these stocks remain overfished because the biomass estimates are below their thresholds. The Atlantic herring determination is based on the most recent assessment, finalized in 2022, using data through 2021, which

supports a determination that the stock continues to be overfished because the biomass remains below its threshold. The Atlantic halibut and Georges Bank yellowtail flounder determinations are based on qualitative estimates of stock size, suggesting that biomass is low. NMFS continues to work with the New England Council to rebuild these stocks.

Dated: March 3, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[RTID 0648-XC807]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's (MAFMC's) Bluefish Monitoring Committee (MC) will hold a public meeting jointly with the Atlantic States Marine Fisheries Commission's Bluefish Technical Committee (TC).

DATES: The meeting will be held on Friday, March 24, 2023, from 10 a.m. to 12:30 p.m. EDT. For agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held via webinar. Connection information will be posted to the calendar at www.mafmc.org prior to the meeting.

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674-2331; www.mafmc.org.

FOR FURTHER INFORMATION CONTACT:

Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526-5255.

SUPPLEMENTARY INFORMATION: The Bluefish Monitoring Committee and Technical Committee will meet to develop potential methods for applying a buffer between sector specific annual catch limits (ACLs) and annual catch targets (ACTs) to account for management uncertainty. At the meeting, the MC and TC will review buffer examples in other fisheries, review recent bluefish overages by

sector, and discuss methods for buffer calculation. The MC and TC will also discuss bluefish specifications updates and next steps as appropriate.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shelley Spedden, (302) 526-5251 at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 3, 2023.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council will hold a public meeting of its Mackerel, Squid, and Butterfish (MSB) Monitoring Committee. See **SUPPLEMENTARY INFORMATION** for agenda details.

DATES: The meeting will be held on Thursday, March 23, 2023, from 3 p.m. to 4 p.m.

ADDRESSES: The meeting will be held via webinar. Connection information will be posted to the calendar prior to the meeting at www.mafmc.org.

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674-2331; www.mafmc.org.

FOR FURTHER INFORMATION CONTACT:

Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526-5255.

SUPPLEMENTARY INFORMATION: The Council's Mackerel, Squid, and Butterfish (MSB) Monitoring Committee will review recent fishery performance and the Scientific and Statistical Committee's (SSC) catch recommendations regarding *Illex* squid. Based on the SSC's recommendations, the Monitoring Committee will develop

recommendations about annual specifications and/or associated management measures.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Shelley Spedden, (302) 526-5251, at least 5 days prior to the meeting date.

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of a permit renewal for an Endangered Species Act (ESA) Section 10(a)(1)(A) scientific enhancement permit (Permit 16608-3R).

SUMMARY: Notice is hereby given that NMFS renewed Section 10(a)(1)(A) scientific enhancement Permit 16608-3R to the Bureau of Reclamation. Authorized activities within the permit are expected to affect and enhance the threatened California Central Valley (CCV) Distinct Population Segment (DPS) of steelhead (*Oncorhynchus mykiss*) and the Southern DPS (sDPS) of North American green sturgeon (*Acipenser medirostris*) through enhancement activities and research and monitoring in the San Joaquin River from the Merced River confluence to the base of Mendota Dam, and select locations on the Mariposa and Eastside bypasses, and entrances to the following off-channel sloughs: Mud Slough, Salt Slough, and Newman Wasteway.

ADDRESSES: The permit application, the permit, and other related documents are available for review through contacting the California Central Valley Office, Section 10(a)(1)(A) permit coordinator (Hilary Glenn; phone: (916) 200-8211 or email at: Hilary.Glenn@noaa.gov). The application for Permit 16608-3R is also available for review at the Authorizations and Permits for
