#### **Proposed Project**

Resources and Services for the CDC National Prevention Information Network—Revision—National Center for HIV/AIDS, Viral Hepatitis, STD, & TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

#### *Background and Brief Description*

The National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention

(NCHHSTP) proposes to continue data collection for the Resources and Services Database of the CDC National Prevention Information Network and is requesting a 3-year approval of this revised information collection request (ICR).

The CDC, NCHHSTP program has the primary responsibility within the CDC and the U.S. Public Health Service for the prevention and control of HIV infection, viral hepatitis, sexually transmitted diseases (STDs), and tuberculosis (TB), as well as for community-based HIV prevention activities, syphilis and TB elimination programs. To support NCHHSTP's mission and to link Americans to prevention, education, and care services, the CDC National Prevention Information Network (NPIN) serves as the U.S. reference, referral, and distribution service for information on HIV/AIDS, viral hepatitis, STDs, and TB. NPIN is a critical member of the network of government agencies, community organizations, businesses, health professionals, educators, and human services providers that educate the American public about the grave threat to public health posed by HIV/AIDS, viral hepatitis, STDs, and TB, and provides services for persons infected with human immunodeficiency virus (HIV).

Established in 1988, the NPIN Resources and Services Database contains entries on approximately 9,000 organizations and is the most comprehensive listing of HIV/AIDS, STD and TB resources and services available throughout the country. This database describes national, state and local organizations that provide services related to HIV/AIDS, viral hepatitis, STDs, and TB, services such as

counseling and testing, prevention, education and support. The NPIN reference staff relies on the Resources and Services Database to respond to thousands of requests each year for information or referral from community based organizations, state and local health departments, and health professionals working in HIV/AIDS, STD and TB prevention. The CDC-INFO (formerly the CDC National AIDS Hotline) staff also uses the NPIN Resources and Services Database to refer up to 110,000 callers each year to local programs for information, services, and treatment. The American public can also access the NPIN Resources and Services database through the NPIN Web site. More than 56 million hits by the public to the Web site are recorded annually.

A representative from each new organization identified will be administered the resource organization questionnaire via the telephone. Representatives may include registered nurses, social and community service managers, health educators, or social and human service assistants. As part of the verification process for organizations currently included in the Resources and Services Database, about 33 percent of the organization's representatives will receive a copy of their current database entry by electronic mail, including an introductory message and a list of instructions. The remaining 70 percent will receive a telephone call to review their database record. There are no costs to respondents other than their time. The total estimated annual burden hours are 1,882.

#### **ESTIMATED ANNUALIZED BURDEN HOURS**

“Current Intelligence Bulletin: Update  
of NIOSH Carcinogen Classification and  
Target Risk Level Policy for Chemical

emphasis will be placed on discussion  
of the following:

#### Overall Questions

(1) Are the proposed carcinogen  
policies consistent with the current  
scientific knowledge of toxicology, risk  
assessment, industrial hygiene, and  
occupational cancer? If not, provide  
specific information and references that  
should be considered.

(2) Is there additional scientific  
information related to the issues of the  
proposed NIOSH carcinogen policies  
that should be considered for inclusion?  
If so, provide information and specify  
references for consideration. Is there any  
discussion in the document that should  
be omitted?

(3) Is the proposed carcinogen  
classification policy explained in a clear  
and transparent manner? Is the basis for  
the proposed policy adequately  
explained? If not, specify (section, page,  
and line number) where clarification is  
needed.

(4) Are there issues relevant to the  
classification of occupational  
carcinogens that have not been  
adequately addressed in this proposed  
policy? If so, provide information and  
specify references for consideration.

(5) NIOSH adapted the OSHA Hazard  
Communication Table Relating  
Approximate Equivalences among  
IARC, NTP RoC, and GHS  
Carcinogenicity Classifications  
(Appendix F, Part D, OSHA Globally  
Harmonized System for Hazard  
Communication) to provide a simple,  
systematic method of determining GHS  
cancer hazard categories. However,  
NIOSH has further considered the GHS  
carcinogen categories 1B and 2 because  
NTP classification *reasonably  
anticipated to be a human carcinogen*  
and IARC classification 2B have criteria  
that overlap the two GHS categories.
