SUPPLEMENTARY INFORMATION:

I. Background

On July 6, 2015, FDA published a Notice of Availability in the **Federal Register** (80 FR 38449) announcing a guidance document entitled “DSCSA Implementation: Product Tracing Requirements for Dispensers—Compliance Policy.” The guidance

described FDA’s intention with regard to enforcement of the product tracing information requirements under section 582(d)(1) of the FD&C Act (21 U.S.C. 360eee–1(d)(1)). FDA is issuing a revised guidance that extends the compliance policy described in the guidance. We are issuing this guidance consistent with our good guidance practices regulation (21 CFR 10.115). We are implementing this guidance without prior public comment because we have determined that prior public participation is not feasible or appropriate (21 CFR 10.115(g)(2)). We made this determination because this guidance document provides information pertaining to certain statutory requirements that took effect on July 1, 2015, regarding the provisions to provide, capture, and maintain product tracing information under section 582(d)(1) of the FD&C Act, and it extends a compliance policy that would have expired for transactions after November 1, 2015. It is important that FDA provide this information before that date. Although this guidance document is immediately in effect, it remains subject to comment in accordance with the Agency’s good guidance practices (21 CFR 10.115(g)(3)).

On November 27, 2013, the DSCSA (Title II of Pub. L. 113–54) was signed into law. Section 202 of DSCSA adds sections 581 and 582 to the FD&C Act, which set forth new definitions and requirements for the tracing of products through the pharmaceutical distribution supply chain. Starting in 2015, trading partners (manufacturers, wholesale distributors, dispensers, and repackagers) were required under sections 582(b)(1), (c)(1), (d)(1), and (e)(1) of the FD&C Act to exchange product tracing information when engaging in transactions involving certain prescription drugs. For dispensers, requirements for the tracing of products through the pharmaceutical distribution supply chain under section 582(d)(1) of the FD&C Act took effect on July 1, 2015. FDA published a guidance document on July 6, 2015, stating that it does not intend to take action against dispensers who, prior to November 1, 2015, (1) accept ownership of product without receiving the product tracing information, as required by section 582(d)(1)(A)(i) of the FD&C Act, or (2) do not capture and maintain the product tracing information, as required by section 582(d)(1)(A)(iii) of the FD&C Act.

Some dispensers—primarily smaller, independent pharmacies and health systems—have expressed concern that they will be unable to comply with

these requirements by November 1, 2015. Thus, FDA recognizes that these dispensers continue to need additional time to work with trading partners to ensure that the product tracing information required by section 582 of the FD&C Act is captured and maintained by dispensers. In light of these concerns, FDA does not intend to take action against dispensers who, prior to March 1, 2016: (1) Accept ownership of product without receiving product tracing information, prior to or at the time of a transaction, as required by section 582(d)(1)(A)(i) of the FD&C Act or (2) do not capture and maintain the product tracing information, as required by section 582(d)(1)(A)(iii) of the FD&C Act. This compliance policy does not extend to other requirements of the FD&C Act applicable to dispensers and other trading partners, including those in section 582 of the FD&C Act, such as verification related to suspect and illegitimate product (including quarantine, investigation, notification, and recordkeeping) and requirements related to engaging in transactions only with authorized trading partners. The guidance document explains the scope of the compliance policy in further detail.

The guidance represents the current thinking of FDA on this topic. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.
