

eliminating them from consideration. However, the staff also notes that such identification of EOCs is generally expected to apply to a PRA developed for the operational phase of a plant's lifecycle. This is based on the premise that there is expected to be a general lack of available, relevant information that would allow meaningful identification of EOCs in pre-operational stages of a plant's lifecycle. Related staff guidance on the treatment of such EOCs during pre-operational phases of a plant's lifecycle is currently under development.

A comment states that EOCs are already captured in FHR-A1 at CC-II for fires where operating experience supports consideration of spurious signals. Therefore, the comment notes that the RG 1.247 position on HR-E4 requiring EOCs at CC-I is not internally consistent with the trial use RG position on FHR-A1 requiring EOCs only at CC-II. The comment also states that, for non-fire hazards, spurious signals should occur with low frequency and would require significant operator error due to the redundancy of information available to the operator.

The staff notes that, while the consideration of spurious signals as a potential cause of an EOC is important and spurious signals may occur due to fire damage, such spurious signals are not the only reason an EOC may occur. NUREG-1880, "ATHEANA User's Guide," (ADAMS Accession No. ML072130359) recommends searching for potential EOCs and the contexts that could cause them. However, while the staff maintains that other sources of EOCs should be considered for identification in CC-I of FHR-A1, the staff did not intend for new, undesired operator actions that could result from spurious indications from fire-induced failure of a single instrument to be identified to meet CC-I of FHR-A1. The staff would therefore not call for such identification as part of meeting the trial use RG. The staff notes that while the comment characterizes the staff positions as "requirements," no regulatory guide establishes requirements. Rather, the exceptions and clarifications in a regulatory guide are guidance to an applicant stating elements of an acceptable method for complying with NRC regulations.

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (<http://www.prc.gov>). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance

with the requirements of 39 CFR 3011.301.¹

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)
