Title: Production Outlook Reports for Un-Registered Renewable Fuels Producers (New Collection).

ICR numbers: EPA ICR No. 2409.01, OMB Control No. 2060-NEW.

ICR Status: This is a request for OMB approval of a new information collection. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: With this information collection request (ICR), we are seeking permission to accept production outlook reports from domestic and foreign renewable fuel producers who are not currently regulated parties under the RFS2 program. The respondents for this ICR are not required to register or report under the RFS2 regulations. Submission of production outlook information to EPA under this ICR will be voluntary.

We believe that many parties would wish to submit this information in order to receive better assistance in understanding and preparing to comply with the RFS2 regulations. A typical respondent would be a renewable fuel producer who is in the process of developing plans for, or constructing, a renewable fuel production facility or that is currently opting out of the RFS2 program under 40 CFR 80.1426(c)(3). Such a respondent would not be required to register or report under RFS2 because it is not yet producing renewable fuel subject to the regulation. However, the respondent would likely wish to provide the information in order to receive feedback from EPA and to aid its planning for future compliance with the RFS2 regulations and annual compliance standards.

Respondents that voluntarily provide the information requested through this ICR will benefit from doing so. The information that respondents provide will allow EPA to more accurately project cellulosic biofuel volumes for the following calendar year, and these volume projections will form the basis of the percentage standards EPA sets under the RFS2 program. Without information from these respondents, EPA's volume projections are more likely to fall below actual projection volumes. Under such circumstances, supply for cellulosic biofuel will exceed demand, and the value of cellulosic biofuel Renewable Identification Numbers (RINs) will fall. RINs are marketable credits that correspond to a

given volume of renewable fuel. Since RIN market price directly affects the economic viability of cellulosic biofuel production, low RIN prices could present economic difficulties to producers. Thus, it is in the interests of these respondents to provide this information to EPA, as doing so could ensure that the market price of RINs appropriately reflects the value of their cellulosic biofuel. This information also serves a more general program purpose, because it will assist EPA in setting the annual RFS2 standard more accurately.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 4 hours per response. Burden means the total time, effort, or financial resources expended by a person to generate, maintain, retain, or disclose or provide information to a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information; to process and maintain information; to disclose and provide information; to adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; to train personnel to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.

Respondents/Affected Entities: Renewable fuel producers who are expected to fall under the general category of petroleum refineries (324110/2911), ethyl alcohol manufacturers (325193/2869), and/or other basic organic chemical manufacturing (325199/2869).

Estimated Number of Respondents: 35.

Frequency of Response: Once.

Estimated Total Annual Hour Burden: 140.

Estimated Total Annual Cost: \$9,940, which includes no capital or O&M costs.

Changes in the Estimates: This is a new information collection.

Dated: February 1, 2011.

Director, Collection Strategies Division.
