Title of Collection: Grantee Reporting Requirements for Smart and Connected Communities (S&CC).

OMB Number: 3145–NEW.

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to establish an information collection.

Proposed Project: The purpose of the NSF Smart and Connected Communities (S&CC) program solicitation is to accelerate the creation of novel intelligent technologies and concepts through high-risk/high-reward research that addresses major challenges and issues faced by communities across the US. A “smart and connected community” is defined as a community

that synergistically integrates intelligent technologies with the natural and built environments and with the functions of civic institutions and organizations. Proposals submitted to the program should be designed to advance one or more of the following community priorities: economic opportunity and growth; safety and security; human and environmental health and wellness; accessibility of critical services and resources; and the overall quality of life for those who live, work, learn, or travel within the community. To meet the goals of the program, researchers should work with community stakeholders to identify and define challenges the community faces, using that interaction and input to generate high-impact, use-inspired, basic research that advances science and engineering.

In addition to standard NSF annual and final report requirements, PIs for all S&CC award recipients will prepare a one-page graphic summary of their project that will be submitted no later than the due date of the first annual report and at the end of the award period. A five-minute project video is also required for all SCC-IRG and SCC-LSR recipients and will be due at the end of the award period. The video should present major project accomplishments. Award recipients must provide NSF permission to publish their video online for public access and/or to share it with interested parties. NSF anticipates the documents may be posted on the S&CC Virtual Organization or other appropriate website.

Use of the Information: NSF will use the information to understand and evaluate the outcomes of funded projects, to foster growth of new scientific communities, and to evaluate the progress of the S&CC program.

Estimate of Burden: 40 hours per award for 20–40 awards for a total of 800–1,600 hours.

Respondents: Universities and Colleges; Non-profit, non-academic organizations;

Estimated Number of Responses per Report: One from each 20–40 awardees annually.

Dated: December 19, 2024.

Reports Clearance Officer, National Science Foundation.
