Proposed Project: Activities to Assess the Feasibility of Creating and Maintaining a National Registry of Child Abuse and Neglect Perpetrators—OMB No. 0990—NEW—Office of the Assistant Secretary for Planning and Evaluation.

Abstract: This study will assess the feasibility of implementing a national registry of child maltreatment perpetrators. The study has two components: A Prevalence Study, and a Key Informant Survey. The Prevalence Study will provide national estimates of the number of persons who have been found to be substantiated perpetrators of child maltreatment in more than one State. The data for this component of the study will come primarily from records from the National Child Abuse and Neglect Data System. These data will be supplemented with encoded names and dates of birth of all substantiated child maltreatment perpetrators over a five year period in order to facilitate inter-state record matching, and will be collected from the States.

The Key Informant Survey will collect information in several areas including: The structure and content of State repositories of data on child maltreatment perpetrators; current legal mandates and policies concerning the sharing of information on substantiated perpetrators; existing practices for sharing information on child maltreatment perpetrators with other states; and perceived benefits and costs to participation in a national registry that may affect States' future participation.

This is a one-time data collection effort. The affected public consists of the 50 States, the District of Columbia, and Puerto Rico. Respondents will include staff designated by state child welfare directors including IT staff, department attorneys, and state child welfare administrators. The length of the request is for two years.
