

Harmonized Tariff Schedule of the United States (HTSUS) subheading and BDC of origin, the value of imports of the article for the first eight months of 2007, and the percentage of imports of that article from that BDC of total imports of that article from all countries. The list includes: (1) GSP-eligible articles from BDCs that have already exceeded the CNLs because their import levels in 2007 already amount to more than \$130 million, or by an amount greater than 50 percent of the total value of U.S. imports of that product in 2007; and (2) GSP-eligible articles that, based upon the eight-month 2007 data, exceed \$100 million or an amount greater than 42 percent of the total value of U.S. imports of that product.

The "D" flag next to articles on the list indicates articles that, based on the eight-month 2007 trade data, may be eligible for a *de minimis* waiver because the total value of imports of that article from all countries is equal to or less than \$12.5 million. Comments on *de minimis* waivers will be requested after publication of a separate **Federal Register** notice in February 2008.

The list published on the USTR Web site is provided for informational purposes only. The list is computer-generated and based on January–August 2007 data, and may not include all articles that may be affected by the GSP CNLs. Regardless of whether or not an article is included on the list, all determinations and decisions regarding the CNLs of the GSP program will depend on full, calendar-year 2007 import data with respect to each GSP-eligible article. Each interested party is advised to conduct its own review of 2007 import data with regard to the possible application of GSP CNLs and submission of a petition to waive the CNLs. Please see the notice announcing the 2007 GSP Review that was published in the **Federal Register** on May 21, 2007 for further details on submitting a petition for a CNL waiver.

*Executive Director for the GSP Program,
Chair, GSP Subcommittee of the Trade Policy
Staff Committee.*

This action is necessary to meet the requirements of the Privacy Act to publish in the **Federal Register** notice of the existence and character of records maintained by the agency (5 U.S.C. 552a(e)(4)).

DATES: The new system will be effective without further notice on December 3, 2007, unless we receive comments that result in a contrary determination.

SUPPLEMENTARY INFORMATION: The Federal Competency Assessment Tool is a web-based instrument for assessing current proficiency levels for mission critical occupations such as leadership and human resource management. It allows individuals to conduct a competency self assessment and supervisors to assess the competencies of their employees and of the position to determine competency strengths and areas for improvement.

The tool advances agencies' human capital management efforts in accordance with the Human Capital Assessment and Accountability Framework. The tool supports efforts in succession management, competency gap closure, competency development, and recruitment and retention. The tool contains competency models, a proficiency scale, a self and supervisor assessment, suggested proficiency levels for determining gaps, and agency-level access to reports and data.

The U.S. Office of Personnel Management (OPM) intends that the tool will have minimal effect on the privacy of individuals. Individual data from the tool is only available to agency designated points of contact for the tools. Additionally, oversight entities (e.g., Government Accountability Office) may request to review such data. The major reports of the tool provide aggregate data, not individual data. If requested, OPM may disclose aggregate level data from the tool via a governmentwide report. The tool was developed with minimizing the risk of unauthorized access to the system of

records as an objective. To ensure the risk is minimized, the tool is hosted on a secure server and offers agency-designated access passwords.
