

quota share owner survey, there are extensive instructions on handling these two topics, but reporting errors are extremely common. To facilitate accurate reporting of intercompany transfers, we will remove a column dedicated to transfer information from Question 19 and remove instructions about recording transfers in Question 20. Then, all of the transfer-related information will be moved to a separate question/table. This change will make the survey instructions easier to understand, allow companies that do not have intercompany transfers to skip the question entirely, and will make it easier to detect and remedy mistakes. Similarly, there are extensive instructions on how to record inventory in Question 20 on the existing form, but no dedicated field for inventory. Instead, participants are currently instructed to add inventory to the other sales categories. We propose adding a new line for each species group to record the inventory volume and value. Similar to the changes to transfers in Question 19 and 20, the new structure of Question 20 clarifies how to complete the form and facilitates identifying and resolving errors. Finally, this change will provide new important information about inventory volumes across years, providing better information about the status of the processing sector to the Pacific Fishery Management Council.

A common performance metric for fisheries programs is hourly wage payments to processing workers. In the current form, we request the total number of workers and total hours worked for the week that includes the 12th of each month and total annual compensation payments. To calculate hourly wages, we must extrapolate to the total hours worked for the year. Through conversations with participants, it has become apparent that within-month employment can have high variability and our extrapolations are not always accurate. We propose requesting the equivalent compensation value for each of the one-week windows to allow for a more accurate calculation of hourly wages. This additional field will also allow us to generate an estimate of within-month employment variability.

Lastly, through conversations with first receivers and vessels, it is known that first receivers provide services to vessels such as bait, ice, loans, moorage, and storage. We plan to add a new category to capture whether those services are provided and whether the vessels are charged for those services. This information will help answer questions often posed by external reviewers when evaluating studies

conducted using the data collected in these surveys.

There are two proposed changes to the Catcher Vessel survey form. The first is to remove two questions. In 2018, at the request of participants in the trawl catch share program, two additional questions were added, Question 17: “Do you track capitalized expenditures and expenses on fishing gear by type (e.g., midwater trawl gear, groundfish bottom trawl gear)?” and Question 18: “Provide the 2021 total capitalized expenditures and expenses associated with each type of fishing gear used in West Coast Fisheries (Washington, Oregon, and California).” Since the implementation of the questions in 2018, there has only been one “Yes” out nearly 700 total responses to Question 17 and therefore no further information about gear-specific costs have been collected. Therefore, there will be no information loss associated with removal of these two questions and there may be a small reduction in total burden hours.

The second proposed change to the Catcher vessel survey form also applies to the Catcher Processor and Mothership forms. This change adds a four-part question about vessel financing. The questions are whether there were any loans on the vessel, how much was still owed at the end of the fiscal year, total amount paid to interest, and total amount paid to principal. The purpose of this new question is to collect the necessary information to comply with recent NOAA fisheries guidance on calculation of net returns of fishing businesses.

Type of Request: Revision of a currently approved collection.

Respondent's Obligation: Required to obtain or retain benefits.

Number of Respondents: 3,513.

Annual Responses: 454,184.

Reporting Frequency: On Occasion.

Needs and Uses: DoD has

consolidated the information collection requirements for reporting Government-furnished property into a single clause at DFARS 252.245–70XX, Management and Reporting of Government Property. The clause implements an electronic process for the collection of required information for effective management and oversight of Government property. The consolidated clause does not impose any new information collection requirements; rather, it consolidates existing requirements in one location. As a result of the consolidation of Government-furnished property reporting requirements under DFARS 252.245–70XX, two associated OMB Control Numbers will be discontinued, as the reporting requirements are now included in this revision for OMB Control Number 0704–0246. The OMB Control Numbers to be discontinued are 0704–0398, DFARS Part 211, Describing Agency Needs and related clause at 252.211; and 0704–0557, DFARS Part 245, Use of the Government Property Clause for Repair of Government-furnished Property (GFP).

The revised information collection includes the following:

- DFARS clause 252.245–70XX, paragraph (b)(1), streamlines reporting of GFP requirements under the GFP module of the Procurement Integrated Enterprise Environment (PIEE) eBusiness platform. The paper form DD Form 1348–1A, Issue Release/Receipt Document, used when authorized by the plant clearance officer and outside the continental United States (OCONUS) for turn-ins to the Defense Logistics Agency disposal activities, is no longer necessary; the electronic equivalent data requirements are generated through the GFP Module of the PIEE.

- DFARS clause 252.245–70XX, paragraph (k), provides procedures for disposal of scrap. The DD Form 1639, Scrap Warranty, is completed by individuals or firms that purchase Government property for its material content from a Government contractor. The DD Form 1639, addressed in 252.245–70XX, paragraph (k)(2), is used for the sole purpose of having the purchasers warrant that the property they have purchased will be used only as scrap.

- DFARS 252.245–70XX, paragraph (l), provides procedures for sale of surplus contractor inventory.

- DFARS clause 252.245–7003, Contractor Property Management System Administration. This clause addresses the requirement for certain contractors to respond in writing to an initial or final determination from the administrative contracting officer that identifies deficiencies in the contractor's property management system. This clause is not part of the 252.245–70XX consolidation; however it continues to be covered under the OMB Control Number for this information collection.

DoD uses this information for management and oversight of Government-furnished property. DFARS clause 252.245–70XX strengthens the accountability and end-to-end traceability of Government property within DoD.

DoD Clearance Officer: Ms. Angela Duncan. Requests for copies of the information collection proposal should be sent to Ms. Duncan at whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.
