Description of the Need for the Information and Proposed Use: HUD developed and tested a cost-effective mail survey instrument for assessing the condition of housing units assisted through HUD programs. The pilot survey, which elicited renters' ratings of their housing, provided high levels of

agreement with independent condition ratings by professional inspectors. HUD implements the survey as an ongoing tool to assess customer ratings of the condition of housing assisted through Federal programs, including the Section 8, FHA, and public housing programs. This survey helps HUD focus its monitoring and technical assistance resources on property owners and housing authorities whose performance most need improvement. It also provides policy and program managers with valid measures for tracking assisted housing conditions over time and across programs.

Agency Form Numbers: None.

Members of the Affected Public: Households residing in Federally-assisted housing, including FHA assisted-housing, public housing, or units receiving assistance from the Section 8 Housing Choice Voucher Program.

Estimation of the total number of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response: Information will be collected by an periodic mail survey of 267,000 of the 4.7 million households who live in housing units assisted through Federal programs. Based on the first year of data collection, a 62 percent response rate is expected. The survey will take approximately 15 minutes to complete. This means a total of 41,385 hours of response time annually for the information collection.

Status of the proposed information collection: Pending OMB approval.
