

deployment site within a particular port, evaluating potential environmental impacts with respect to the particular conditions present at each site. Each draft SED will solicit public comment, and substantive comments received will be included in the Appendix to a final SED. Notice of the SED will be published in the **Federal Register** and in a local newspaper of general circulation in the particular affected locality. At that time, after receipt and evaluation of comments, CBP will determine whether to prepare a FONSI or an EIS with respect to each affected port.

Public Review and Comments

The draft PEA will be available for public review for a period of 30 days beginning on the date this document is published in the **Federal Register**. The draft PEA can be reviewed at the following address: U.S. Customs and Border Protection, Suite 1575, 1300 Pennsylvania Ave., NW., Washington, DC 20229. [Docket No. FR-4912-N-07]

Draft Conformity Determination for the Proposed World Trade Center Memorial and Redevelopment Plan City of New York, New York County, NY

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice of availability.

SUMMARY: In accordance with the federal Conformity Rule, the Lower Manhattan Development Corporation (LMDC) has reviewed the air quality analysis conducted for the proposed World Trade Center Memorial and Redevelopment Plan (Proposed Action). LMDC is a subsidiary of the Empire State Development Corporation (a political subdivision and public benefit corporation of the State of New York) and, as the recipient of HUD Community Development Block Grant funds appropriated for the World Trade Center disaster recovery and rebuilding efforts, acts as the responsible entity for compliance with the National Environmental Policy Act (NEPA) and the Clean Air Act, 42 U.S.C. 7401 *et seq.* (particularly sections 7506(c) and (d)) in accordance with 24 CFR 58.4 and 58.5. A Final Generic Environmental Impact Statement (FGEIS) for the Proposed Action has been distributed and is currently available for public review (69 FR 22866, April 27, 2004).

The Proposed Action is located in Lower Manhattan, New York County, which has been designated by the United States Environmental Protection Agency (EPA) as a moderate non-attainment area for particulate matter less than 10 micrometers in aerodynamic diameter (PM₁₀), and a severe non-attainment area for ozone. The area is in attainment of all other criteria pollutants: nitrogen dioxide (NO₂), lead, sulfur dioxide (SO₂) and carbon monoxide (CO). LMDC's review

has been conducted consistent with the requirements of 40 CFR part 93, subpart B: "Determining Conformity of General Federal Actions to State or Federal Implementation Plans" issued on November 30, 1993. LMDC has determined that, during some of the construction years, annual nitrogen oxide (NO_x) emissions from all the portions of the Proposed Action that may be federally-funded are predicted to exceed the *de minimis* threshold of 25 tons per year; accordingly, LMDC has prepared a general conformity determination to demonstrate that the federally-funded portions of the Proposed Action conform with the ozone State Implementation Plan.

As per the requirement in 40 CFR 93.153(h)(1), this notice lists the proposed activities that are presumed to conform and the basis for these presumptions. A comprehensive presentation of the bases for the conformity presumptions is included in the report entitled "Draft Conformity Determination: World Trade Center Memorial and Redevelopment Plan." This document is currently available for public review and comment.

DATES: Comments must be received by 5 p.m. eastern daylight time (e.d.t.) on June 11, 2004.

ADDRESSES: The Draft Conformity Determination is available at the following locations:

Chatham Square Library, 33 East Broadway, New York, NY 10002.

New Amsterdam Library, 9 Murray Street, New York, NY 10007.

Hamilton Fish Library, 415 East Houston Street, New York, NY 10002.

SUPPLEMENTARY INFORMATION:

A. Background

The Proposed Action involves the construction of a World Trade Center Memorial and memorial-related improvements, as well as commercial, retail, museum and cultural facilities, new open space areas, new street configurations, and certain infrastructure improvements at the World Trade Center Site (WTC Site) bounded by Liberty, Church, and Vesey Streets and Route 9A and the Southern Site, which comprises two city blocks south of the WTC Site and portions of Liberty Street and Washington Street. A detailed description of the project components and the proposed construction process can be found in the FGEIS. The Draft Conformity Determination available for public review explicitly states which portions of the Proposed Action would be funded by HUD (or by another Federal agency) as well as portions that might be federally-funded (but could be funded by a non-Federal entity); however, all emissions that would be federally-funded or might be federally-funded have been included in the Draft Conformity analysis in order to present a conservative analysis. Specifically, the federally-funded portions of the Proposed Action might include cultural uses in the northwest and southwest quadrants of the WTC Site; the Memorial; public open spaces; deconstruction of the building at 130 Liberty Street (Deutsche Bank); and/or sub-grade construction at the Southern Site.

The Clean Air Act (CAA), as amended in 1990, defines a non-attainment area (NAA) as a geographic region that has been designated as not meeting one or more of the National Ambient Air Quality Standards (NAAQS). The Proposed Action is located in Lower Manhattan, New York County, which has been designated by the EPA as a moderate NAA of the NAAQS for PM₁₀ and severe NAA for ozone. No formal designation has been made to date regarding attainment of the NAAQS for fine particulate matter less than 2.5 micrometers in aerodynamic diameter (PM_{2.5}), which became effective September 16, 1997. The area is in attainment of all other criteria pollutants: nitrogen dioxide (NO₂), lead, sulfur dioxide (SO₂) and carbon monoxide (CO). EPA had re-designated New York City as in attainment for CO on April 19, 2002 (67 FR 19337); the CAA requires that a maintenance plan
