

and local applicability. Each objective has both subobjectives and suggested emphasis areas. For the complete program design, please consult the RFI. EPA's questions are as follows:

- How can EPA and future grantees expand upon the work done through previous cooperative agreements to build HCP capacity, capitalize on existing resources, and avoid duplicating efforts?
- What populations—besides farmworkers, pesticide handlers, and applicators—are at high risk of pesticide-related illness and would benefit from more highly trained HCPs?
- How can EPA ensure that activities under Objective 1 (training and technical assistance) are responsive to the social determinants of health, cultural context, and vulnerabilities of patients at high risk of pesticide-related illness?
- What steps can future grantees take to ensure that recognition, treatment, and management of pesticide-related illness continue to improve at local partner organizations after the project has concluded? What steps can they take to ensure that reporting continues to improve?
- What networks, organizations, and stakeholders are examples of collaborators under Objective 2 (partnership program)? Which could be effective at monitoring and evaluating the project?
- What are examples of activities that this cooperative agreement could support under Objective 1 (training and technical assistance)? Under Objective 2 (partnership program)?
- Do the objectives, as written, exclude any collaborators or activities that would support the program goals?

#### *B. What is the request for information?*

In addition to soliciting comment on the questions posed in Unit III.A. of this document, EPA is seeking stakeholder input on the RFI document that is available in the docket. Specifically, EPA is interested in comments about the types of activities the program could support; about populations at high risk of pesticide-related illness (and who would thus benefit from more highly trained clinicians); and about additional ways to ensure that training and technical assistance under the program accounts for the cultural context, social determinants of health, and vulnerabilities of these populations.

EPA encourages all potentially interested parties, including individuals, professional associations, governmental and non-governmental organizations, academic institutions, research institutions, medical institutions, non-profits, community-based organizations, Indian Tribes, and private sector entities to provide responses to any or all questions. To the extent possible, the Agency asks commenters to please cite any public data related to or that supports the responses, and to the extent permissible, describe any supporting data that is not publicly available.
