[Docket No. EL06-1-000]

Niagara Mohawk Power Corporation, a National Grid Company, Complainant v. New York State Reliability Council, L.L.C. and New York Independent System Operator, Inc., Respondent; Notice of Complaint

October 11, 2005.

Take notice that on October 6, 2005, Niagara Mohawk Power Corporation, a National Grid Company (National Grid), pursuant to section 206 of the Commission's Rules of Practice and Procedure, 18 CFR 385.206, filed a Complaint against the New York State Reliability Council (NYSRC) and New York Independent System Operator (NYISO) requesting that the Commission issue an order directing: (1) NYSRC to make certain changes in its methodology for determining the region's Installed Reserves Margin and installed Capacity Requirement; (2) NYISO to file, as needed, conforming amendments to its tariff and manuals; and (3) any other relief as the Commission deems just and proper.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to

become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant and all parties to this proceeding.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Comment Date: 5 p.m. Eastern Time on October 26, 2005.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP05-364-000]

ANR Pipeline Company; Notice of Availability of the Environmental Assessment for the Proposed Wisconsin 2005 Expansion Project

October 7, 2005.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by ANR Pipeline Company (ANR) in the above-referenced dockets.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of the proposed project. ANR proposes to install a total of 6.86 miles of pipeline, add a compressor unit at an existing compressor station, construct a new compressor station, and perform minor upgrade work at 5 existing meter stations in Wisconsin. Specifically, the project includes:

- About 3.08 miles of 16-inch outside diameter (OD) looping¹ pipeline (designated as the Little Chute Loop) in Outagamie County, WI;
- About 3.78 miles of 30-inch OD looping pipeline (designated as the Madison Lateral Loop in Rock County, WI;
- A new 2,370 horsepower (hp) reciprocating compressor unit and associated equipment at the existing Janesville Compressor Station in Rock County, WI;
- A new 20,620 hp compressor station comprised of two 10,310 hp units to be built at an existing meter station site (designated as the Goodman Compressor Station) in Marinette County, WI; and
- 5 existing meter station upgrades in Dane, Marathon, and Columbia Counties, WI.

The purpose of the proposed facilities would be to create about 168,241 decatherms per day of incremental firm capacity on its pipeline system to accommodate growth in demand from all market segments in Wisconsin.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 502-8371.

Copies of the EA have been mailed to Federal, State and local agencies, public interest groups, interested individuals, newspapers, and parties to this proceeding.

Any person wishing to comment on the EA may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your comments to: Secretary, Federal Energy Regulatory Commission, 888

¹ A loop is a segment of pipeline installed adjacent to an existing pipeline which connects to the existing pipeline at both ends of the loop. The loop allows more gas to be moved through the system.
