Project: FASD Diagnosis and Intervention Programs in the Fetal Alcohol Spectrum Disorder (FASD) Center of Excellence—New

Since 2001, SAMHSA's Center for
Substance Abuse Prevention has been
operating a Fetal Alcohol Spectrum
Disorder (FASD) Center of Excellence
which addresses FASD mainly by
providing trainings and technical
assistance and developing and

supporting systems of care that respond
to FASD using effective evidence-based
practices and interventions.

Currently the integration of evidence-
based practices into service delivery
organizations is being accomplished
through subcontracts. One such
intervention which integrates diagnosis
and intervention strategies into existing
service delivery organizations is the
FASD Diagnosis and Intervention
programs targeting children 0-18 years
of age. The Diagnosis and Intervention
programs use the following 11 data
collection tools.

DESCRIPTION OF INSTRUMENTS/ACTIVITY FOR THE DIAGNOSIS AND INTERVENTION PROGRAMS

| Instrument/Activity | Description |
|--|--|
| Screening and Diagnosis Tool | The purpose of the screening and diagnosis tool is to determine eligibility to participate in the SAMHSA FASD Center Diagnosis and Treatment Intervention. The form includes demographic, screening, and diagnostic data. |
| Positive Monitor Tracking | The Positive Monitor Tracking form is to monitor the outcome of placing a child (ages 0-3 years) on a positive monitor. |
| Services Child is Receiving at the time of the FASD Diagnosis | The Services Child is Receiving at the time of the FASD Diagnosis form is to record services the child is receiving at the time of an FASD diagnosis. |
| Services Planned and Provided based on Diagnostic Evaluation | The Services Planned and Provided based on Diagnostic Evaluation form is to record services planned and received based on the diagnostic evaluation. |
| Services Delivery Tracking Form | The Services Delivery Tracking form is for the services provided during every visit. |
| End of Intervention/Program Improvement Measure—Case Manager. | The End of Intervention/Program Improvement Measure—Case Manager form is for the case manager to report on the overall improvement in the child as a result of receiving services. |
| End of Intervention/Program Improvement Measure—Parent/Guardian. | The End of Intervention/Program Improvement Measure—Parent/Guardian form is for the parent/guardian to report on the overall improvement in the child as a result of receiving services. |
| End of Intervention/Program Customer Satisfaction with Service | The End of Intervention/Program Customer Satisfaction with Service form is to determine customer satisfaction (parents) with the SAMHSA FASD Center Diagnosis and Intervention project. |
| Outcome Measures (Children 0-7 years) | The Outcome Measures (Children 0-7 years) form is an outcomes measure checklist used to record measures every six months from start of service to end of service, at end of intervention, at 6 months follow-up, and 12 months follow-up. |
| Outcome Measures (Children 8-18 years) | The Outcome Measures (Children 8-18 years) form is an outcomes measure checklist used to record measures every six months from start of service to end of service, at end of intervention, at 6 months follow-up, and 12 months follow-up. |
| Lost to follow-up | The Lost to follow-up form is used if the child is no longer accessible for follow-up. |

Eight subcontracts were awarded in February 2008 to integrate the FASD Diagnosis and Intervention program within existing service delivery organization sites. Using an integrated service delivery model all sites are screening children using an FASD screening tool, obtaining a diagnostic evaluation, and providing services/interventions as indicated by the diagnostic evaluation. Specific interventions are based upon the

individual child's diagnosis. Six of the sites are integrating the FASD Diagnosis and Intervention projects either in a child mental health provider setting or in a dependency court setting and serve children ages 0-7 years. Two of the sites are delinquency courts and serve children 10-18 years of age. Data collection at all sites involves administering the screening and diagnosis tool, recording process level indicators such as type and units of

service provided; improvement in functionality and outcome measures such as school performance, stability in housing/placement, and adjudication measures (10-18 yrs only). Data will be collected at baseline, monthly, every six months from start of service to end of service, at end of intervention, at 6 months follow-up, and 12 months follow-up.
