SUPPLEMENTARY INFORMATION:

Agenda: The meeting presentations will be heard, viewed, captioned, and recorded through an online teleconferencing platform. The committee will discuss new drug application 216401, for omecamtiv mecarbil tablets, submitted by Cytokinetics, Inc. The proposed indication is to reduce the risk of cardiovascular death and heart failure events in patients with symptomatic chronic heart failure with reduced ejection fraction. The committee will discuss whether the phase 3 trial (GALACTIC-HF) establishes substantial evidence of effectiveness of omecamtiv mecarbil and whether the benefits of omecamtiv mecarbil outweigh the risks when used according to the applicant's proposed dosing regimen.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available on FDA's website at the time of the advisory committee meeting. Background material and the link to the online teleconference meeting room will be available at <https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link. The meeting will include slide presentations with audio components to allow the presentation of materials in a manner that most closely resembles an in-person advisory committee meeting.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. All electronic and written submissions submitted to the Docket (see **ADDRESSES**) on or before November 29, 2022, will be provided to the committee. Oral presentations from

the public will be scheduled between approximately 2 p.m. and 3 p.m. Eastern Time. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before November 18, 2022. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by November 21, 2022.

[Docket No. FDA-2022-D-0814]

Infant Formula Transition Plan for Exercise of Enforcement Discretion: Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing the availability of a guidance for industry entitled "Infant Formula Transition Plan for Exercise of Enforcement Discretion: Guidance for Industry." We are issuing this guidance document to protect public health by helping to stabilize the supply of infant formula in the United States and to maintain a consistent supply of a variety of infant formula products. Under the guidance, we intend to exercise enforcement discretion until January 6, 2023, for infant formula products that are listed in letters of enforcement discretion that FDA has issued or will issue to specific manufacturers, in response to information provided under our May 2022 "Infant Formula Enforcement Discretion Policy: Guidance for Industry," which remains in effect until November 14, 2022. For those manufacturers that wish to continue to market specific products in the United States under enforcement discretion after January 6, 2023, the guidance further details additional steps that manufacturers can take toward lawful marketing of such products—and the timeline under which such steps should be taken—for FDA to consider the continued exercise of enforcement discretion. This guidance document will help infant formula manufacturers meet applicable regulatory requirements while ensuring that consumers have continued access to formulas that are currently fulfilling the needs of infants consuming such products. We are also announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995 (PRA). The proposed collection pertains to the submission of information necessary to facilitate FDA's exercise of enforcement discretion, as discussed in the guidance document.

DATES: Fax written comments on the collection of information by November 7, 2022. FDA is requesting immediate OMB approval of this emergency processing. The announcement of the guidance is published in the **Federal Register** on October 6, 2022.
