II. Background

A. What Action is the Agency Taking?

Section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) directs EPA to reevaluate existing pesticides to ensure that they meet current scientific and regulatory standards. In 2008, EPA issued a RED for sulfometuron methyl under section 4(g)(2)(A) of FIFRA. In response to a notice of availability published in the **Federal Register** of November 12, 2008 (73 FR 219) (FRL-8388-5), the Agency received comments and mitigation proposals submitted by the technical registrant, user groups, and individuals. The Agency's response to comments is available for viewing in the docket. The amended Sulfometuron Methyl RED reflects changes resulting from Agency consideration of these comments and mitigation proposals. The RED amendment for sulfometuron methyl concludes EPA's reregistration eligibility decision making process for this herbicide.

Stakeholder comments, mitigation proposals, and other information received by the Agency following the publication of the Sulfometuron Methyl RED allowed EPA to further refine the ecological risk assessment for non-target plant species and to revise the buffer zone requirements for sulfometuron methyl. Based on the comments and proposals, EPA also refined the occupational handler exposure risk estimates and revised the personal protective equipment (PPE) requirements for sulfometuron methyl. The label table incorporated into the Sulfometuron Methyl RED amendment includes modifications which specify label language for required application parameters, buffer zones, and PPE requirements.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA, as amended, directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing the active ingredient are eligible for reregistration," before calling in product specific data on individual end-use products and
