

traffic rules and regulations governing the flight of aircraft for the protection and identification of aircraft and property and persons on the ground. Title 14, CFR, part 91, subchapter F, prescribes flight rules governing the operation of aircraft within the United States. These rules govern the operation of aircraft (other than moored balloons, kites, unmanned rockets and unmanned free balloons) within the United States and for flights across international borders. Paragraphs 91.153 and 91.169, address flight plan information requirements. Paragraph 91.173 states requirements for when an instrument flight rules (IFR) flight plan must be filed. International Standards Rules of the Air, Annex 2 to the Convention on International Civil Aviation paragraph 3.3 states requirements for filing international flight plans. In addition, a Washington, District of Columbia (DC) Special Flight Rules Area (SFRA) was implemented requiring pilots operating within a certain radius of Washington, DC to follow special security flight rules. The SFRA also includes three (3) general aviation airports in Maryland (College Park, Clinton/Washington Executive/Hyde Field, and Friendly/Potomac Airfield) where pilots are required to file a flight plan regardless of whether they are flying under visual flight rules (VFR) or IFR. This collection of information supports the Department of Homeland Security and the Department of Defense in addition to the normal flight plan purposes.

Almost 100 percent of flight plans are filed electronically. However, as a courtesy to the aviation public, flight plans may be submitted in paper form. Flight plans may be filed in the following ways:

- Air carrier and air taxi operations, and certain corporate aviation departments, have been granted authority to electronically file flight plans directly with the FAA. The majority of air carrier and air taxi flights are processed in this manner.
- Air carrier and air taxi operators may submit pre-stored flight plan information on scheduled flights to Air Route Traffic Control Centers (ARTCC) to be entered electronically at the appropriate times.
- Pilots may call 1-800-WX-BRIEF (992-7433) and file flight plans with a flight service station specialist who enters the information directly into a computer system that automatically transmits the information to the appropriate air traffic facility. Pilots calling certain flight service stations have the option of using a voice recorder to store the information that will later be entered by a specialist.

- Private and corporate pilots who fly the same aircraft and routes at regular times may prestore flight plans with flight service stations. The flight plans will then be entered automatically into the air traffic system at the appropriate time.

- Pilots who visit a flight service station in person may choose to file a flight plan by using a paper form. The data will then be entered into a computer and filed electronically. The pilot will often keep the paper copy for his/her record.

Respondents: Air carrier and air taxi operations, and certain corporate aviation departments, General Aviation Pilots.

Frequency: on occasion.

Estimated Average Burden per

Response: 2.5 minutes per flight plan.

Estimated Total Annual Burden: 718,618 hours.

Issued in Washington, DC, on June 28, 2023.

Air Traffic Control Specialist, Office of Flight Service Safety and Operations, AJR-B.

Federal Railroad Administration

[Docket No. FRA-2023-0002-N-12]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of information collection; request for comment.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, this notice announces that FRA is forwarding the Information Collection Request (ICR) abstracted below to the Office of Management and Budget (OMB) for review and comment. The ICR describes the information collection and its expected burden. On April 21, 2023, FRA published a notice providing a 60-day period for public comment on the ICR.

DATES: Interested persons are invited to submit comments on or before August 4, 2023.

ADDRESSES: Written comments and recommendations for the proposed ICR should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain.

Find the particular ICR by selecting “Currently under Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Ms. Arlette Mussington, Information Collection Clearance Officer, at email: arlette.mussington@dot.gov or telephone: (571) 609-1285 or Ms. Joanne Swafford, Information Collection Clearance Officer, at email: joanne.swafford@dot.gov or telephone: (757) 897-9908.

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501-3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. See 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. On April 21, 2023, FRA published a 60-day notice in the **Federal Register** soliciting public comment on the ICR for which it is now seeking OMB approval. See 88 FR 24657.

FRA has received one comment related to the proposed collection of information. The Chief Economist of the Bureau of Economic Analysis (BEA) sent an electronic letter date May 30, 2023, expressing BEA's strong support for FRA's continued collection of on the Accident/Incident Reporting and Recordkeeping forms. The Chief Economist noted that the data collected on these forms are crucial to key components of BEA's economic analyses and requested that FRA keep BEA informed of any modifications to these forms. Before OMB decides whether to approve this proposed collection of information, it must provide 30-days' notice for public comment. Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507(b)-(c); 5 CFR 1320.12(d); see also 60 FR 44978, 44983, Aug. 29, 1995. This ICR responds to the information collection mandate in Section 22421(b) of the Infrastructure Investment and Jobs Act (IIJA) and also provides routine updates to 49 CFR part 225's overall information collection request renewal.

OMB believes the 30-day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect.

Comments are invited on the following ICR regarding: (1) Whether the information collection activities are necessary for FRA to properly execute its functions, including whether the information will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: Accident/Incident Reporting and Recordkeeping.

OMB Control Number: 2130-0500.

Abstract: The railroad accident/incident reporting regulations in 49 CFR part 225 require railroads to submit reports summarizing collisions, derailments, and certain other

accidents/incidents involving damages above a periodically revised dollar threshold, as well as certain injuries to passengers, employees, and other persons on railroad property. As the reporting requirements and the information needed regarding each category of accident/incident are unique, a different form is used for each category.

In response to the mandate in IJIA Section 22421,¹ FRA intends to utilize Form FRA F 6180.54 Special Study Blocks 49a and 49b to collect the following information for a projected five-year period: (1) the length of the involved trains, in feet, and (2) the number of crew members who were aboard a controlling locomotive involved in an accident at the time of such accident. This modification produces a minimal additional burden with respect to what is already being reported, as FRA estimates that the utilization of the Special Study Blocks will require an additional 2 minutes to complete, for a total average burden time of approximately 2 hours and 2 minutes per form, adding an additional

57 hours to the overall collection request.

FRA has made multiple adjustments to its estimated paperwork burden for the entire part 225 collection request, resulting in a reduction of 5,563 hours, from 35,846 hours in the current inventory, to 30,283 hours in the requested inventory. The primary reason for the reduction in the estimated paperwork burden is the expected decrease in the number of submissions. Specifically, under § 225.19(d), FRA expects submissions will decrease significantly from 11,636 hours to 7,040 hours due to a reduction in the number of injuries reported in the last two years. There is no change in the method of collection; this is a routine update for this 3-year ICR renewal period.

Type of Request: Revision of a currently approved collection.

Affected Public: Businesses
Form(s): FRA F 6180.54; .55; .55a; .56; .57; .78; .81; .97; .98; .107; .150.

Respondent Universe: 784 railroads.

¹ Specifically, IJIA Section 22421(b) requires FRA to update Special Study Block 49 on Form FRA F 6180.54, for a period of five years, to collect information on: (1) the number of cars and length

of trains involved in an accident/incident; and (2) the number of crew members who were aboard a controlling locomotive involved in an accident at the time of such accident. Railroads are already

required to report the number of cars in the consist of a train involved in an accident on Form FRA F 6180.54, Field 35.
