

The agency order is first exposed on Hybrid for at least three seconds; (ii) the order entry firm has been bidding or offering for at least three seconds prior to receiving the agency order that is executable against such bid or offer; or (iii) the order entry firm proceeds in accordance with the floor-based open outcry crossing rules contained in CBOE Rule 6.74, *Crossing Orders*. Similarly, order entry firms may not execute an order they represent as agent against orders solicited from members and non-member broker-dealers unless the agency order is first exposed on Hybrid for at least three seconds. During this three-second exposure period for crossing orders, other members may enter orders to trade against the exposed order. CBOE proposes to reduce these exposure periods to one second.

Rule 6.74A provides that orders entered into AIM must be exposed for a random time period that is not less than three seconds and not more than five seconds, to provide an opportunity for additional trading interest to be entered before the orders are automatically executed. Rule 6.74B provides that orders entered into the Solicitation Auction Mechanism (the "SAM Auction") must be exposed for a three second period, also to provide an opportunity for additional trading interest to be entered before the orders are automatically executed. CBOE proposes to reduce the exposure period for AIM and the exposure period for the SAM Auction to one second.

III. Discussion and Commission Findings

The Commission has carefully reviewed the proposed rule change and finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.⁴ In particular, the Commission finds that the proposed rule change is consistent with section 6(b)(5) of the Act,⁵ which, among other things, requires that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The Commission also finds that the proposed rule change is

consistent with section 6(b)(8) of the Act,⁶ which requires that the rules of an exchange not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Commission believes that, in the electronic environment of Hybrid, reducing each of the exposure periods from three seconds to one second could facilitate the prompt execution of orders, while continuing to provide participants in Hybrid with an opportunity to compete for exposed bids and offers. According to the Exchange, numerous CBOE market participants have the capability to and do opt to respond within a one-second exposure period on its Hybrid trading platform. Specifically, the Exchange noted that the exposure and allocation timers for the Exchange's Hybrid Agency Liaison ("HAL") mechanism, which employs the same type of mechanical messaging as the AIM and SAM Auction mechanisms, are currently both set at 0.300 seconds and numerous market participants can and do opt to respond to HAL exposure messages within this time frame. The Exchange also noted that market participants receive mechanically messaged information about book updates, and are able to and do opt to automatically submit orders and quotes in response to those book updates on the Hybrid trading system, in substantially the same manner as they would respond to a HAL message. Accordingly, the Commission believes that it is consistent with the Act for these order exposure times to be reduced from three seconds to one second.

IV. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,⁷ that the proposed rule change (SR-CBOE-2008-16) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁸

of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to amend CBOE Rule 8.3 relating to the appointment cost for options on the CBOE Russell 2000 Volatility Index (RVX) and options on the CBOE Nasdaq 100 Volatility Index (VXN). Presently, RVX and VXN each have an appointment cost of .25. CBOE proposes to reduce the appointment cost of RVX and VXN such that they would fall within one of the six tiers according to trading volume, and be subject to the quarterly rebalancing of the tiers that CBOE conducts. It is currently anticipated that each would be placed in Tier F and have an appointment cost of .001. CBOE is proposing to lower the appointment cost in these two option classes in light of their trading volume, which CBOE does not believe justifies a weighting of .25. Also, CBOE believes it would be appropriate for these two classes to be subject to the quarterly rebalancing of the tiers.

Members then could utilize the excess membership capacity to hold an appointment and quote electronically in an appropriate number of Hybrid 2.0 option classes, which promotes competition and efficiency.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations under the Act applicable to a national securities exchange and, in particular, the requirements of Section 6(b) of the Act.⁵ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) Act⁶ requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts and, in general, to protect investors and the public interest. Lowering the appointment cost for RVX and VXN options promotes competition and efficiency by allowing Market-Makers to utilize their excess membership capacity to trade other option classes.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition not necessary or

appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange neither solicited nor received comments on the proposal.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, provided that the self-regulatory organization has given the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change or such shorter time as designated by the Commission,⁷ the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁸ and Rule 19b-4(f)(6) thereunder.⁹ At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.
