Correction

In the **Federal Register** of December 19, 2023 in FR Doc. 2023-27834, on page 87753, in the third column, correct the third paragraph of the "Needs and Uses" section to read:

The information collected will be used: (1) to monitor catch and bycatch in federally managed commercial fisheries; (2) to understand the population status and trends of fish stocks and protected species, as well as the interactions between them; (3) to determine the quantity and distribution of net benefits derived from living marine resources; (4) to predict the biological, ecological, and economic impacts of existing management action and proposed management options; (5) to ensure that the observer programs can safely and efficiently collect the information required for the previous four uses; and (6) for criminal and/or civil investigations by law enforcement agencies. In particular, these biological and economic data collection programs contribute to legally mandated analyses required under the Magnuson-Stevens Fishery Conservation and Management Act (MSA), the Endangered Species Act (ESA), the Marine Mammal Protection Act (MMPA), the National Environmental Policy Act (NEPA), the Regulatory Flexibility Act (RFA), Executive Order 12866 (E.O. 12866), as well as a variety of state statutes.
