

slightly increased flight times, which would result in increased costs to aircraft operators both during the interim phase, if necessary, and once the redesigned airways are established. These economic impacts would be spread across the entire potentially affected aviation industry in Alaska. FAA's actions would not affect the provision of public services associated with aviation in the study area communities.

The CAP Glider Academy could no longer conduct its glider instruction at Clear Airport due to the proposed Restricted Areas and would have to relocate to another airport such as Ladd Army Airfield or Fort Greely. The impacts of relocation would be minimized if the Civil Air Patrol is able to negotiate a long-term arrangement for operation of the Glider Academy that provides participants with no-cost lodging or camping options and discounted meal service. Arrangements for relocating the CAP Glider Academy have not been completed, and costs associated with the new location are not known.

G. Mitigation Measures and Monitoring

Since development of the initial concept for expanding the restricted airspace at CAFS, as described in the LRDR CAFS Final EIS, the design of the proposed Restricted Areas has been refined to further minimize impacts on the aviation community based on feedback from pilot associations, public safety organizations and first responders, and airspace user groups. The MDA did not identify any significant environmental impacts arising from the Proposed Action and, therefore, is not identifying specific mitigation measures. All practicable means to mitigate impacts associated with the decision have been considered.

H. Environmentally Preferred Alternative

Based on the findings of the EIS, the No Action Alternative would be the environmentally preferred alternative because the existing Restricted Area at CAFS would not need to be expanded. The operations at Clear Airport would not be affected, and FAA's proposed modifications to federal airways and instrument flight procedures would not be necessary. However, the LRDR would not meet current operational requirements for the layered MDS and would not have the ability to adapt to rapidly evolving adversary tactics and technologies, nor would it satisfy the purpose or need for the Proposed Action.

I. Decision

In accordance with NEPA, we have considered the information contained within the LRDR CAFS EIS, comments from the public, input from regulatory agencies, LRDR system capabilities, the analysis of the missile threat to the U.S., layered MDS performance and operational effectiveness, and other relevant factors in deciding whether to operate the LRDR continuously at CAFS.

We have decided to select the Proposed Action over the No Action Alternative. Although the No Action Alternative would have fewer environmental impacts, it would not fully support the primary mission of the layered MDS to provide continuous and precise tracking and discrimination of missile threats launched against the U.S. The LRDR would not meet current operational requirements for the MDS and would not have the ability to adapt to rapidly evolving adversary tactics and technologies.

Abstract: This information collection requests approval for a revision to a previously approved collection that includes annual reporting requirements for the Higher Education Emergency Relief Fund (HEERF) program and obtains information on how the funds were used. Under the current unprecedented national health emergency, the legislative and executive branches of government have come together to offer relief to those individuals and industries affected by the COVID–19 virus under the Coronavirus Aid, Relief, and Economic
