

Abstract of Information Available

A total of three cultural items have been requested for repatriation. The three unassociated funerary objects consist of two charmstones and one serpentine fragment. The first charmstone is made of granite with the tip broken off and remnants of asphaltum on the end. The second charmstone is made of granite. The small serpentine fragment has a hole drilled through one portion. These items were collected from unprovenienced locations in Solano County, California by Rodney M. Rulofson, a historical columnist with the Solano County Courier. They were donated to the Museum in 1962.

Determinations

The Santa Barbara Museum of Natural History has determined that:

- The three unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Cachil DeHe Band of Wintun Indians of the Colusa Indian Community of the Colusa Rancheria, California; Kletsel Dehe Wintun Nation of the Cortina Rancheria (previously listed as Kletsel Dehe Band of Wintun Indians); and the Yocha Dehe Wintun Nation, California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on

or after May 2, 2025. If competing requests for repatriation are received, the Santa Barbara Museum of Natural History must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The Santa Barbara Museum of Natural History is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Abstract of Information Available

A total of one cultural item has been requested for repatriation. The one unassociated funerary object (16928) is an undrilled slate gorget removed by Charles Hatch in 1891 from a burial in a mound located on his farm in Lot 118, Stockbridge Reservation, Calumet County, WI. Frederick Stanton Perkins purchased the gorget from Mr. Hatch and sold it to the LMA in 1904. The Stockbridge Munsee Community, Wisconsin lived in New York and Massachusetts before relocation to the east shore of Lake Winnebago in Calumet County, WI in the 1830s. Lot 118 was assigned to Austin E. Quinney, a Mohican sachem. Because the gorget was removed from a mound, it may pre-date Stockbridge Munsee occupation in Calumet County. Lake Winnebago falls within the ancestral territory of the Ho-Chunk Nation of Wisconsin and the Menominee Indian Tribe of Wisconsin. The LMA has no record that the gorget was exposed to any hazardous substances while in the LMA's stewardship.

Determinations

The LMA has determined that:

- The one unassociated funerary object described in this notice is reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary object has been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.

- There is a reasonable connection between the cultural item described in this notice and the Ho-Chunk Nation of Wisconsin; Menominee Indian Tribe of Wisconsin; and the Stockbridge Munsee Community, Wisconsin.

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or

Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after May 2, 2025. If competing requests for repatriation are received, the LMA must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. The LMA is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.
