#### SUPPLEMENTARY INFORMATION:

*Background:* “Sexual and gender minority” is an umbrella term that includes, but is not limited to, individuals who identify as lesbian, gay, bisexual, asexual, transgender, Two-Spirit, queer, and/or intersex. Individuals with same-sex or -gender attractions or behaviors and those with a difference in sex development are also included. These populations also encompass those who do not self-identify with one of these terms but whose sexual orientation, gender identity or expression, or reproductive development is characterized by non-binary constructs of sexual orientation, gender, and/or sex.

In accordance with Section 404N of the 21st Century Cures Act (Pub. L. 114–255), the Director of NIH shall encourage research on SGM populations. The Sexual and Gender Minority Research Office (SGMRO)

coordinates SGM-related research and activities by working directly with NIH Institutes, Centers, and Offices. The Office was officially established in September 2015 within the Division of Program Coordination, Planning, and Strategic Initiatives (DPCPSI) in the NIH Office of the Director and has the following operational goals: (1) Advance rigorous research on the health of SGM populations in both the extramural and intramural research communities; (2) expand SGM health research by fostering partnerships and collaborations with a strategic array of internal and external stakeholders; (3) foster a highly skilled and diverse workforce in SGM health research; and (4) encourage data collection related to SGM populations in research and the biomedical research workforce. The Scientific Workshop on Violence and Related Health Outcomes in Sexual and Gender Minority Communities represents an important step in pursuing these goals specifically in the field of violence research.
