

to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 7 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 7 copies

of the protest or intervention to the Federal Energy regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). [Project No. 13846-000]

Qualified Hydro 29, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

November 9, 2010.

On September 29, 2010, Qualified Hydro 29, LLC filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Mississinewa Lake Dam Hydroelectric Project No. 13846, to be located at the existing Mississinewa Lake Dam on the Mississinewa River, in the City of Peru, in Miami County, Indiana. The Mississinewa Lake Dam is owned by the United States government and operated by the U.S. Army Corps of Engineers.

The proposed project would consist of: (1) The existing earth filled dam which is 140 feet in height with an overall length of 8,000 feet; (2) a new reinforced concrete powerhouse, 45 feet by 65 feet, to be located downstream of the existing stilling basin; (3) a new 75 foot-long, 10.0-foot diameter penstock; (4) two vertical Kaplan turbine-generator units with a combined capacity of 7.0 megawatts; (5) a new 8 MVA substation; (6) a new two mile-long, 12.5 to 34.5-kilovolt transmission line; and (7) appurtenant facilities. The project would have an estimated annual generation of 21.0 gigawatt-hours.
