Jurisdictional Determination Forms are tools used by the USACE to help implement Section 404 of the Clean Water Act (CWA) and Sections 9 and 10 of the Rivers and Harbors Act of 1899 (RHA). JDs specify what geographic areas will be treated as subject to regulation by the USACE under one or both statutes. The three types of JDs included in this package are the Approved Jurisdictional Determination (AJD), Dry Land AJD, and Preliminary Jurisdictional Determination (PJD). The AJD form provides an official determination that there are/are not jurisdictional aquatic resources on a parcel based on the jurisdictional requirements, while the Dry Land AJD provides official determination that jurisdictional aquatic resources are absent. The PJD form is used to determine whether aquatic resources that exist on a particular parcel "may be" subject to regulatory jurisdiction.

It should be noted that the forms in this collection package may support associated permit reviews included in collection 0710-0003 which expires on 28 February 2022. Though they are being reviewed to be cleared under a new OMB control number, these forms and data sheets or any variations thereof will be included in the next renewal request for collection 0710-0003, which includes the standard and nationwide permit application forms, and will also include any local district forms in existence when the renewal package is submitted.
