SUPPLEMENTARY INFORMATION:

Introduction

On April 20, 2010, the mobile offshore drilling unit, Deepwater Horizon, which was being used to drill a well for BP Exploration and Production, Inc. (BP), in the Macondo prospect (Mississippi Canyon 252—MC252), experienced a significant explosion, fire, and subsequent sinking in the Gulf of Mexico, resulting in an unprecedented volume of oil and other discharges from the rig and from the wellhead on the seabed. The DWH oil spill is the largest oil spill in U.S. history, discharging millions of barrels of oil over a period of 87 days. In addition, well over 1 million gallons of dispersants were applied to the waters of the spill area in an attempt to disperse the spilled oil. An undetermined amount of natural gas was also released into the environment as a result of the spill.

State and Federal trustees conducted the natural resource damage assessment (NRDA) for the Deepwater Horizon oil spill under the Oil Pollution Act 1990 (OPA; 33 U.S.C. 2701 *et seq.*). Pursuant to the OPA, Federal and State agencies act as trustees on behalf of the public to assess natural resource injuries and losses and to determine the actions required to compensate the public for those injuries and losses. The OPA further instructs the designated trustees to develop and implement a plan for the restoration, rehabilitation, replacement,

or acquisition of the equivalent of the injured natural resources under their trusteeship, including the loss of use and services from those resources from the time of injury until the completion of restoration to baseline (the resource quality and conditions that would exist if the spill had not occurred).

The Deepwater Horizon Trustees are:

- U.S. Department of the Interior (DOI), as represented by the National Park Service, U.S. Fish and Wildlife Service (USFWS), and Bureau of Land Management;
 - National Oceanic and Atmospheric Administration (NOAA), on behalf of the U.S. Department of Commerce;
 - U.S. Department of Agriculture (USDA);
 - U.S. Environmental Protection Agency (EPA);
 - State of Louisiana Coastal Protection and Restoration Authority, Oil Spill Coordinator's Office, Department of Environmental Quality, Department of Wildlife and Fisheries, and Department of Natural Resources;
 - State of Mississippi Department of Environmental Quality;
 - State of Alabama Department of Conservation and Natural Resources and Geological Survey of Alabama;
 - State of Florida Department of Environmental Protection and Fish and Wildlife Conservation Commission; and
 - State of Texas: Texas Parks and Wildlife Department, Texas General Land Office, and Texas Commission on Environmental Quality.
- The Trustees reached and finalized a settlement of their natural resource damage claims with BP in an April 4, 2016, Consent Decree approved by the U.S. District Court for the Eastern District of Louisiana. Pursuant to that Consent Decree, restoration projects in the Alabama Restoration Area are now chosen and managed by the Alabama TIG. The Alabama TIG is composed of the following six Trustees: Alabama Department of Conservation and Natural Resources, Geological Survey of Alabama, DOI, NOAA, EPA, and USDA.

Background

The Alabama TIG Restoration Plan III/ Environmental Assessment (RP III/EA) selected seven projects for implementation, allocating funds from two restoration types identified in the DWH Consent Decree: “Provide and Enhance Recreational Opportunities” and “Birds.” The Alabama TIG RP III addendum subsequently approved funding for the two projects conditionally approved in the RP III/EA, one of which was the Bon Secour National Wildlife Refuge Recreation Enhancement—Mobile Street Boardwalk
