

Conclusion: The above represents a short summary of the Audit Program. The Texas Flexible Permit Audit Agreement is available in the public docket for this notice at <http://www.regulations.gov>, and represents the full requirements of the program.

EPA is proposing the Audit Program to ensure that Texas flexible permit holders have a path forward to secure compliance with the requirements of the CAA. As EPA has stated that Texas flexible permits are not independently Federally-enforceable permits, industry representatives have expressed concern regarding the legal ramifications of operating facilities and making facility changes at facilities that do not have independently Federally-enforceable permits. Representatives of citizens living in areas near facilities regulated under flexible permits are concerned that in some instances flexible permits allow facilities to emit more harmful pollution than would be allowed under Federal law. We believe the Audit Program has the potential to result in beneficial reductions in the levels of air pollutants being emitted by flexible permit holders as well as providing industry a regulatory framework for continuing operations until independently Federally-enforceable permitting authorizations can be obtained.
