

inches in grades X52 through X56, and with wall thickness measuring greater than 0.688 inches in grades X60 or greater.

- Having an outside diameter greater than or equal to 30 inches and less than 36 inches, with wall thickness measuring greater than 1.250 inches in grades A, B, and X42, with wall thickness measuring greater than 1.000 inches in grades X52 through X56, and with wall thickness measuring greater than 0.875 inches in grades X60 or greater.

- Having an outside diameter greater than or equal to 36 inches and less than 42 inches, with wall thickness measuring greater than 1.375 inches in grades A, B, and X42, with wall thickness measuring greater than 1.250 inches in grades X52 through X56, and with wall thickness measuring greater than 1.125 inches in grades X60 or greater.

- Having an outside diameter greater than or equal to 42 inches and less than 64 inches, with a wall thickness measuring greater than 1.500 inches in grades A, B, and X42, with wall

thickness measuring greater than 1.375 inches in grades X52 through X56, and with wall thickness measuring greater than 1.250 inches in grades X60 or greater.

- Having an outside diameter equal to 48 inches, with a wall thickness measuring 1.0 inch or greater, in grades X-80 or greater.

The product currently is classified under U.S. Harmonized Tariff Schedule ("HTSUS") item numbers 7305.11.10.30, 7305.11.10.60, 7305.11.50.00, 7305.12.10.30, 7305.12.10.60, 7305.12.50.00, 7305.19.10.30, 7305.19.10.60, and 7305.19.50.00. Although the HTSUS item numbers are provided for convenience and customs purposes, the written description of the scope is dispositive.

Antidumping Duty Order

In accordance with section 736(a)(1) of the Act, the Department is directing Customs officers to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the merchandise

exceeds the export price (or constructed export price) of the merchandise for all relevant entries of welded large diameter line pipe from Mexico. The antidumping duties will be assessed on all unliquidated entries of welded large diameter line pipe from Mexico entered, or withdrawn from warehouse, for consumption on or after August 15, 2001, the date on which the Department published its notice of preliminary determination in the Federal Register. See Notice of Final Determination of Sales at Less Than Fair Value: Welded Large Diameter Line Pipe From Mexico, 67 FR 566, (January 4, 2002). On or after the date of publication of this notice in the Federal Register, customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below. The "All Others" rate applies to all exporters of subject merchandise from Mexico. The weighted-average dumping margins are as follows:

Exporter/Manufacturer	Weighted-Average Margin
Productora Mexican de Tuberia, S.A. de C.V.	49.86
Tubacero, S.A. de C.V.	49.86
All Others	49.86

This notice constitutes the antidumping duty order with respect to welded large diameter line pipe from Mexico. Interested parties may contact the Department's Central Records Unit, room B-099 of the main Department of Commerce building, for copies of an updated list of antidumping duty orders currently in effect.

This order is published in accordance with section 736(a) of the Act.

February 22, 2002

Faryar Shirzad,

Assistant Secretary for Import Administration.

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR part 301), we invite comments on the

question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5 P.M. in Suite 4100W, U.S. Department of Commerce, Franklin Court Building, 1099 14th Street, NW., Washington, DC.

Docket Number: 01-024. Applicant: Howard Hughes Medical Institute, 4000 Jones Bridge Road, Chevy Chase, MD 20815-6789.

Instrument: Electron Microscope, Model JEM-1010. **Manufacturer:** JEOL Ltd., Japan. **Intended Use:** The instrument is intended to be used for the study of the Drosophila neuromuscular junction and optic lobe, and rodent and human tissues. Of interest is the process by which synaptic vesicles are synthesized, fuse with the plasma membrane, release their contents and are recycled within the

nerve cell. Several neurodegenerative diseases using mouse models of specific human diseases including Spinocerebral ataxia and Rett Syndrome will also be studied. *Application accepted by Commissioner of Customs:* November 16, 2001.

Docket Number: 01-026. Applicant: Emory University, Department of Pharmacology, Room 5160, W Rollins Center, 1510 Clifton Road, Atlanta, GA 30322. **Instrument:** High Speed CCD Camera System Set, Model MiCAM 01. **Manufacturer:** SciMedia Ltd., Japan.

Intended Use: The instrument is intended to be used in experiments to study stroke and ischemia involving protease-activated-receptors (PAR). The instrument will allow direct testing where the PARs are located in the brain and the effect of activation. *Application accepted by Commissioner of Customs:* December 10, 2001.

Docket Number: 00-027. Applicant: University of Cincinnati, 3125 Eden Avenue, PO Box 670521, Cincinnati, OH 45267-0521.

Instrument: Electron Microscope, Model JEM-1230. **Manufacturer:** JEOL, Ltd, Japan.

Intended Use: The instrument is intended to be used in the following experiments:

(1) Using immunocytochemical methods at the ultrastructural level, the normal cellular distribution of known trafficking molecules, and their altered localization in Hermansky-Pudlak Syndrome cell lines will be assessed.

(2) To determine whether transgenic techniques designed to interrupt the cytoskeleton were successful in disrupting the structure of the intermediate filament component of the cytoskeleton.

(3) Circadian transplant studies to confirm that graft efferents actually establish synaptic contacts with host brain regions among animals exhibiting different patterns of behavioral recovery.

(4) Studies on transgenic mouse lines in which the endogenous surfactant protein B (SP-B) gene has been inactivated and replaced with a human transgene encoding a deleted/mutated SP-B proprotein.

Application accepted by
Commissioner of Customs: December 28, 2001.

Docket Number: 02-001. **Applicant:** University of Vermont, Department of Orthopaedics, Burlington, VT 05405. **Instrument:** Upgrade for X-ray based Motion Analysis System. **Manufacturer:** RSA BioMedical Innovations AB, Sweden. **Intended Use:** The instrument is intended to be used to make measurements of the biomechanical behavior of different joints of the body and to study different types of joint trauma, surgical repair, and healing responses. **Application accepted by**
Commissioner of Customs: January 22, 2002.

Docket Number: 02-002. **Applicant:** Fox Chase Cancer Center, 7701 Burholme Avenue, Philadelphia, PA 19111. **Instrument:** Electron Microscope, Model Tecnai 12 BioTWIN. **Manufacturer:** FEI Company, The Netherlands. **Intended Use:** The instrument is intended to be used to study biological materials including nucleic acids, proteins, organelles, cultured cells, and tissues prepared for electron microscopy. Specifically, studies of ultrastructure and the intracellular localization and trafficking of biologically important molecules including chromatin, structures critical to the regulation of DNA replication, cytokinesis, and meiosis, products of oncogene and tumor suppressor genes, and viral components. **Application accepted by**
Commissioner of Customs: January 22, 2002.

Docket Number: 02-003. **Applicant:** Albert Einstein College of Medicine of

Yeshiva University, 1300 Morris Park Avenue, Bronx, NY 10461. **Instrument:** Electron Microscope, Model Tecnai 20. **Manufacturer:** FEI Company, The Netherlands. **Intended Use:** The instrument is intended to be used to study the structure of biological macromolecular complexes and to determine the 3-dimensional structure of the cytoskeleton of normal metastatic mammalian cells and the mechanism of intracellular transport and cell movement. **Application accepted by**
Commissioner of Customs: January 22, 2002.

The Scripps Research Institute; Notice of Decision on Application for Duty-Free Entry of Electron Microscope

This is a decision pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Suite 4100W, U.S. Department of Commerce, Franklin Court Building, 1099 14th Street, NW., Washington, DC.

Docket Number: 01-022. **Applicant:** The Scripps Research Institute, La Jolla, CA 92037. **Instrument:** Electron Microscope, Model Tecnai F20T. **Manufacturer:** FEI Company, The Netherlands. **Intended Use:** See notice at 67 FR 2196, January 16, 2002. **Order Date:** March 30, 2001.

Comments: None received. **Decision:** Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as the instrument is intended to be used, was being manufactured in the United States at the time the instrument was ordered. **Reasons:** The foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States at the time of order of the instrument.

Secretarial Business Development Mission to China, April 21-25, 2002

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice to announce Secretary Evans' business development mission to China during April 21-25, 2002.

SUMMARY: Secretary of Commerce Donald L. Evans will lead a senior-level business development mission to Beijing and Shanghai, China, on April 21-25, 2002, in conjunction with the 14th session of the U.S.-China Joint Commission on Commerce and Trade (JCCT) to be held in Beijing the week of
