**Abstract:** The New Source Performance Standards (NSPS) for Surface Coating of Large Appliances were proposed on December 24, 1980; promulgated on October 27, 1982; and most-recently revised on October 17, 2000. These regulations apply to large appliance coating facilities. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart SS.

**Form Numbers:** None.

**Respondents/affected entities:**

Facilities that perform surface coating of large appliance products.

**Respondent's obligation to respond:**

Mandatory (40 CFR part 60, subpart SS).

**Estimated number of respondents:** 16 (total).

**Frequency of response:** Quarterly, semiannually.

**Total estimated burden:** 1,600 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$192,000 (per year), which includes \$2,100 in annualized capital/startup and/or operation & maintenance costs.

**Changes in the estimates:** There is an adjustment decrease in the total

estimated burden from the most-recently approved ICR. This increase is not due to any program changes. The adjustment decrease in burden from the most-recently approved ICR is due to a decrease in the number of sources. The number of respondents has been adjusted downwards from the most-recently approved ICR to reflect a more accurate estimate of subject sources, based on data collected through EPA's Enforcement and Compliance History Online (ECHO) database and a review of large appliance coating facilities subject to other federal regulations. The decrease in the number of respondents also results in a decrease in the operation and maintenance costs. There are no estimated new respondents anticipated in the next three years; therefore, there are no capital costs.

**Abstract:** The Resource Conservation and Recovery Act (RCRA) requires EPA to establish a national regulatory program to ensure that hazardous wastes are managed in a manner protective of human health and the environment. Under this program, EPA regulates newly generated hazardous wastes, as well as hazardous remediation wastes (*i.e.*, hazardous wastes managed during cleanup). Hazardous remediation waste management sites must comply with all parts of 40 CFR part 264 except subparts B, C, and D. In place of these requirements, they need to comply with performance standards based on the general requirement goals in these sections, which are codified at 40 CFR 264.1(j).

Under § 264.1(j), owners/operators of remediation waste management sites must develop and maintain procedures to prevent accidents. These procedures must address proper design, construction, maintenance, and operation of hazardous remediation waste management units at the site. In addition, owners/operators must develop and maintain a contingency and emergency plan to control accidents that occur. The plan must explain specifically how to treat, store, and dispose of the hazardous remediation waste in question, and must be implemented immediately whenever fire, explosion, or release of hazardous waste or hazardous waste constituents that could threaten human health or the environment. In addition, the Remedial Action Plan streamlines the permitting process for remediation waste management sites to allow cleanups to take place more quickly.

**Form Numbers:** None.

**Respondents/affected entities:** Entities potentially affected by this action are the private sector, as well as State, Local, or Tribal governments.

**Respondent's obligation to respond:** Mandatory (RCRA § 3004(u)).

**Estimated number of respondents:** 170.

**Frequency of response:** One-time.

**Total estimated burden:** 5,114 hours per year. Burden is defined at 5 CFR 1320.03(b).

**Total estimated cost:** \$348,088 (per year), which includes \$53,693 in annualized capital or operation & maintenance costs.

**Changes in the estimates:** There is a decrease of 1,247 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to an adjustment in Agency calculations.
