

DEPARTMENT OF TRANSPORTATION**Federal Highway Administration****[Docket No. FHWA–2023–0053]****Agency Information Collection
Activities: Notice of Request for
Revision of a Currently Approved
Information Collection**

AGENCY: Federal Highway Administration (FHWA), U.S. Department of Transportation (USDOT).

ACTION: Notice of request for revision of currently approved information collection.

SUMMARY: The FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval for renewal of an existing information collection that is summarized below **SUPPLEMENTARY INFORMATION.** We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by February 12, 2024.

ADDRESSES: You may submit comments identified by DOT Docket ID Number FHWA–2023–0053 by any of the following methods:

- **Website:** For access to the docket to read background documents or comments received, go to the Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- **Fax:** 1–202–493–2251.

- **Mail:** Docket Management Facility; U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery or Courier:** U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Daniel Jenkins, 202–366–1067, Daniel.jenkins@dot.gov, National Travel Behavior Data Program Manager, Federal Highway Administration, Office of Policy, 1200 New Jersey Avenue SE, Room E83–414, Washington, DC 20590, Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: 2024 Next Generation National Household Travel Survey (NextGen NHTS).

OMB Control #: 2125–0545.

Background: Title 23, United States Code, section 502 authorizes the USDOT to carry out advanced research

and transportation research to measure the performance of the surface transportation systems in the US, including the efficiency, energy use, air quality, congestion, and safety of the highway and intermodal transportation systems. The USDOT is charged with the overall responsibility to obtain current information on national patterns of travel, which establishes a data base to better understand travel behavior, evaluate the use of transportation facilities, and gauge the impact of the USDOT's policies and programs.

The NHTS is the USDOT's authoritative nationally representative data source for daily passenger travel. This inventory of travel behavior reflects travel mode (e.g., private vehicles, public transportation, walk and bike) and trip purpose (e.g., travel to work, school, recreation, personal/family trips) by U.S. household residents. Survey results are used by Federal and State agencies to monitor the performance and adequacy of current facilities and infrastructure, and to plan for future needs.

The collection and analysis of national transportation data has been of critical importance for nearly half a century. Previous surveys were conducted in 1969, 1977, 1983, 1990, 1995, 2001, 2009, 2017 and 2022. The current survey will be the tenth in this series, and allow researchers, planners, and officials at the State and Federal levels to monitor travel trends.

Data from the NHTS are widely used to support research needs within the USDOT, and State and local agencies, in addition to responding to queries from Congress, the research community and the media on important issues. Current and recent topics of interest include:

- Travel to work patterns by transportation mode for infrastructure improvements and congestion reduction,
- Access to public transit, paratransit, and rail services by various demographic groups,
- Measures of travel by mode to establish exposure rates for risk analyses,
- Support for Federal, State, and local planning activities and policy evaluation,
- Active transportation by walk and bike to establish the relationship to public health issues,
- Vehicle usage for energy consumption analysis,
- Traffic behavior of specific demographic groups such as Millennials and the aging population.

Within the USDOT, the Federal Highway Administration (FHWA) holds responsibility for technical and funding

coordination. The National Highway Traffic Safety Administration (NHTSA), Federal Transit Administration (FTA), and the Bureau of Transportation Statistics (BTS) are also primary data users and have historically participated in project planning and financial support.

**Proposed Data Acquisition
Methodology**

NHTS data are collected from a stratified random sample of households that represent a broad range of geographic and demographic characteristics. Letters and postcards are sent to selected households requesting some basic demographic and contact information and inviting them to participate in the diary survey. The recruitment survey is completed on the study website.

Households who complete the recruitment survey are subsequently invited to complete a diary survey. All household members aged 5 and older are eligible. The household is assigned to record their travel on a specific day and asked to note every trip taken during a 24-hour period. Based upon their preferences, the travel information is then reported through a survey website, a smartphone app., or through a telephone interview. Reminders are sent periodically to households who do not respond within the expected timeframe. Monetary incentives are provided in increasing amounts for all households that complete the survey.

The survey will collect data during an entire 12-month period so that all 365 days of the year including weekends and holidays are accounted for. A total of 7,500 households will comprise the national sample for the 2024 survey.

Issues Related to Sampling. The sampling design reflects the U.S. household trends of decreasing landline telephone ownership and increasing access to the internet. The 2024 NextGen NHTS will leverage this shift in technology, in particular the move away from home telephone usage, to structure a research design that uses mail, web, smartphone app. and telephone data collection modes. The revised methodological approach starts with a national address-based sample (ABS).

The survey sample will be drawn from the ABS frame maintained by Marketing Systems Group (MSG). It originates from the U.S. Postal Service (USPS) Computerized Delivery Sequence file (CDS) and is updated on a monthly basis. MSG also provides the ability to match some auxiliary variables (e.g., race/ethnicity, education, household income) to a set of sampled

addresses. MSG geocodes their entire ABS frame, so block-, block group-, and tract-level characteristics from the Decennial Census and the American Community Survey (ACS) may be appended to addresses and used for sampling and/or data collection purposes.

Sample Size. Completed surveys will be obtained from a nationally representative sample of 7,500 households. Assuming response rates of 26 percent for the recruitment stage, 60 percent at the diary stage, and a residency rate of 92 percent for sampled addresses, a total of 53,000 sampled addresses will be required to attain the targeted 7,500 responding households.

Stratification. Census division will be used for stratification, with an urban/rural classification used as substrata. The target sample size (of responding households) will then be initially allocated among the strata according to the proportion of addresses falling in the stratum determined by the counts of addresses from the American Community Survey (ACS).

With the ABS approach, identifying targeted areas that correspond to those for which estimates can be developed from the NHTS data are straightforward. Geocoding and GIS processing can be used to link addresses to States and counties in a highly reliable fashion. There can be some ambiguity for addresses that are P.O. boxes or are listed as rural route addresses. These can be handled in a routine manner with a set of well-defined rules as such addresses will represent only a small proportion of the population. Thus, no important issues arise in the definition of areas with an ABS sample design that relies on mail for initial contact, as is the case with the proposed approach.

Assignments for recording travel data by sampled households will be equally distributed across all days to ensure a balanced day-of-week distribution. The sample (of recruitment letters to households) will be released periodically through a process that will control the balance of travel days by month.

Data Collection Methods

An updated approach to enhancing survey response has been developed. This includes providing progressive monetary incentives and using a mail with push-to-web recruitment survey that is just 5 minutes in length. Upon completing the recruitment survey, household members aged 5 and older are offered the opportunity to provide their travel on an assigned travel day via a smartphone app. or web using a

unique personal identification number (PIN) or telephone interview.

Information Proposed for Collection

Recruitment. The survey will begin with mailing the sampled households an initial invitation letter followed by postcard and letter reminders. The letter will contain a \$2 cash incentive and promised incentives (up to \$20) to encourage diary completion. Participants will complete the recruitment survey on the web. The survey is designed to collect key household information (e.g., enumeration of household members), basic demographic characteristics (e.g., age, gender, etc.), and personal contact information (e.g., email address and telephone number). To support recruitment, the study will provide a toll-free number on survey materials. The study website will provide responses to likely questions and will serve as the portal to the survey.

Diary Retrieval. The travel day diary data will be collected from respondents either from self-reporting via the web or a smartphone app., or from professionally trained interviewers using a computer-assisted telephone interviewing (CATI) system. The questionnaire and back-end systems allow for sophisticated branching and skip patterns to enhance data retrieval by asking only those questions that are necessary and appropriate for the individual participant. Look-up tables are included at the back end to assist with information such as vehicle makes and models. Google API is used to assist in identifying specific place names and locations. The location data for the participant's home, workplace, or school are stored and automatically inserted in the dataset for trips after the first report. Household rostering is a list of all vehicles and persons in the household that allows a trip to be reported from one household member and can include another household member who travel together to be inserted into the record for the second person. This automatic insert of information reduces the burden of the second respondent to be queried about a trip already reported by the initial respondent. Data range, consistency and edit checks are automatically programmed to reduce reporting errors, survey length, and maintain the flow of information processing. Data cross checks also help reduce the burden by ensuring that the reporting is consistent within each trip.

All respondent facing materials and instruments will be reviewed for Section 508 compliance using the rules specified in sections 1194.22—"Web-

based intranet and internet information and applications" and 1194.23—"Telecommunications products." All materials will be available in both English and Spanish language forms. Spanish translations will be developed using industry standards and will apply reverse-translation protocols.

Estimated Burden Hours for Information Collection

Frequency: This is a periodic study last conducted in 2022.

Respondents. A stratified random sample of 7,500 households across the 50 States and the District of Columbia will be included in the survey. Household will include an average of 2.5 members for a total of 18,750 individual respondents 5 years and older to the diary survey.

Estimated Average Burden per Response. It will take approximately 5 minutes per household member to complete the recruitment survey, and 20 minutes per eligible household member to complete the diary survey.

Estimated Total Annual Burden Hours. It is estimated that a total of 29,375 persons will complete the survey. This includes 5,000 persons in households who completed just the recruitment survey and did not participate in the diary survey and 16,875 persons who completed both the recruitment and diary surveys. This results in approximately 6,667 hours of support for this data collection effort assuming an average of 5 minutes per household for the recruitment, and 20 minutes per household member (aged 5 and older) for the diary survey.

Public Comments Invited

You are asked to comment on any aspect of this information collection, including: (1) whether the proposed collection of information is necessary for the USDOT's performance, including whether the information will have practical utility; (2) the data acquisition methods; (3) the accuracy of the USDOT's estimate of the burden of the proposed information collection; (4) the types of data being acquired; (5) ways to enhance the quality, usefulness, and clarity of the collected information; and (6) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on: December 11, 2023.

Jazmyne Lewis,

Information Collection Officer, Federal Highway Administration.

BILLING CODE 4910-22-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2023-0181]

Agency Information Collection Activities; Renewal of an Approved Information Collection: Motor Carrier Records Change Form

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for its review and approval and invites public comment. The purpose of this ICR titled, "Motor Carrier Records Change Form," is to collect information required by the Office of Registration to process name changes, address changes, and reinstatements of operating authority for motor carriers, freight forwarders, and brokers. FMCSA requests approval to renew an ICR titled, "Motor Carrier Records Change Form."

DATES: Comments on this notice must be received on or before February 12, 2024.

ADDRESSES: You may submit comments identified by Docket Number FMCSA-2023-0181 using any of the following methods:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the online instructions for submitting comments.

- **Mail:** Dockets Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590-0001.

- **Hand Delivery or Courier:** Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590-0001 between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366-9317 or (202) 366-9826 before visiting Dockets Operations.

- **Fax:** (202) 493-2251.

To avoid duplication, please use only one of these four methods. See the "Public Participation and Request for Comments" portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Mr. Jeffrey Secrist, Office of Registration, Chief, Registration, Licensing, and Insurance Division, DOT, FMCSA, West Building 6th Floor, 1200 New Jersey Avenue SE, Washington, DC 20590; (202) 385-2367; jeff.secrist@dot.gov.

SUPPLEMENTARY INFORMATION:

Instructions

All submissions must include the Agency name and docket number. For detailed instructions on submitting comments, see the Public Participation heading below. Note that all comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided. Please see the Privacy Act heading below.

Public Participation and Request for Comments

If you submit a comment, please include the docket number for this notice (FMCSA-2023-0181), indicate the specific section of this document to which your comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so FMCSA can contact you if there are questions regarding your submission. If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard, or print the acknowledgement page that appears after submitting comments online.

To submit your comment online, go to <https://www.regulations.gov/docket/FMCSA-2023-0181/document>, click on this notice, click "Comment," and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

Comments received after the comment closing date will be included in the docket and will be considered to the extent practicable.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

Background

FMCSA registers for-hire motor carriers under 49 U.S.C. 13902, surface freight forwarders under 49 U.S.C. 13903, and property brokers under 49 U.S.C. 13904. Each registration is effective from the date specified under 49 U.S.C. 13905(c). "Procedures for changing the name or business form of a motor carrier, freight forwarder, or property broker," (49 CFR 365.413) states that motor carriers, forwarders, and brokers must submit the required information to FMCSA's Office of Registration requesting the change. Paragraph (f) of 49 CFR 360.3 mentions fees that FMCSA collects for "petition for reinstatement of revoked operating authority," but does not provide any specifics for the content that petition should take.

Motor carriers, freight forwarders, and property brokers are required to use Form MCSA-5889 to request a name or address change and to request reinstatement of a revoked operating authority. Respondents can submit the form online through the Licensing and Insurance (L&I) website, by fax, or by mail. According to data collected between 2020 and 2022, annually, approximately 1 percent of forms are submitted by mail; 7 percent are submitted by fax; and 92 percent are submitted online. The information collected is then entered in the L&I database by FMCSA staff.

Form MCSA-5889 enables FMCSA to maintain up-to-date records so that the Agency can recognize the entity in question in case of enforcement actions or other procedures required to ensure that the carrier is fit, willing, and able to provide for-hire transportation services, and so that entities whose operating authority has been revoked can resume operation if they are not otherwise blocked from doing so. This multi-purpose form, filed by registrants on a voluntary, as-needed basis, simplifies the process of gathering the information needed to process the entities' requests in a timely manner, with the least amount of effort for all parties involved.
