SUPPLEMENTARY INFORMATION: The Draft EIS analyzes the potential impacts of opening public lands to geothermal leasing and potential development of federally owned geothermal resources in the HGLA of southwestern Inyo County, California, east of the Inyo National Forest, west of the China Lake Naval Weapons Station, and south of the South Haiwee Reservoir. The HGLA consists of an estimated 22,805 acres of BLM-administered federal mineral estate that would be considered for competitive geothermal leasing under 43 CFR part 3200. An updated inventory

of lands with wilderness characteristics determined that lands with wilderness characteristics are not found within the HGLA. The proposed action is to amend the CDCA Plan to identify public lands as being suitable for geothermal leasing and allow the project area to be leased under the authority of the Geothermal Steam Act of 1970, as amended (30 U.S.C. 1001 *et seq.*), and to approve three pending non-competitive geothermal leases applications. The purpose and need for amending the CDCA Plan is to establish a management framework for appropriate exploration and development of geothermal resources, based upon evaluation of the various land use, and environmental resources within the HGLA. The BLM's purpose and need for approving the pending lease applications, for approximately 4,460 acres of Federal mineral estate, is to facilitate appropriate exploration and development of geothermal resources in the HGLA, consistent with the BLM's management of other important resources in the HGLA.

Alternatives thus far identified for evaluation in the EIS include:

- (a) Open the entire HGLA to geothermal exploration and development, with restrictions on water use and authorize the pending leases;
- (b) Close the HGLA to geothermal exploration and development and deny the pending leases;
- (c) Open the HGLA to geothermal exploration and development with additional specific stipulations and restrictions regarding surface occupancy and water use and authorize the pending leases;
- (d) Close sensitive resource areas within the HGLA to geothermal exploration and development, leave open all other areas, and authorize the pending leases; and
- (e) The no action alternative, which would not identify the HGLA as suitable or unsuitable for geothermal exploration, development, and utilization, and would deny the pending leases.

The BLM published a Notice of Intent to prepare an EIS on September 11, 2009, in the **Federal Register** [74 FR 46786]. Publication of the Notice of Intent initiated a public scoping period, which included four public scoping meetings. Through the public scoping process the BLM received 14 comment letters and numerous verbal comments. Comments received through the scoping process and consultation carried out pursuant to Section 106 of the National Historic Preservation Act and other Federal mandates, identified the following issues and concerns to be

considered when developing the EIS: The BLM's purpose and need, alternatives development, air quality, geothermal resources, hazardous materials, Native American concerns, potential land use conflicts with agriculture and recreation, public health and safety, social and economic issues, transportation, noise, cumulative impacts, cultural resources, wildlife, visual resources, and surface or groundwater resources. Lands with wilderness characteristics are not present within the planning area.

The BLM, in compliance with Federal Lands Policy and Management Act of 1976, National Environmental Policy Act of 1969, and all other relevant Federal laws, Executive orders, and management policies of the BLM, used an interdisciplinary approach in development of the plans, working collaboratively, in order to consider the variety of resource issues and concerns identified.

Please note that public comments and information submitted including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at the above address during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.
