

6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Hydraulic Institute, Inc. ("HI") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: Hydraulic Institute, Inc., Parsippany, NJ. The nature and scope of HI's standards development activities are: more than twenty pump standards for pumps prepared and updated in accordance with the canvass approval process of the American National Standards Institute ("ANSI"). The HI standards define a product, material, process or procedure relating to, *inter alia*, centrifugal, reciprocating, vertical, rotary, sealless, air operated or controlled volume metering pumps, with reference to one or more of the following: nomenclature, composition, construction, dimensions, tolerances, safety, operating characteristics, performances, quality, rating, testing and service. Further HI's supplier members and others participate in the development of guidelines and standards within the scope of, *inter alia*, motors and drives, monitoring devices, seals, housings, and more broad-based topics such as electronic data exchange, pump piping, intake design, viscosity correction, variable speed pumping and life cycle cost.

Dorothy B. Fountain,

Deputy Director of Operations, Antitrust Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Interactive Advertising Bureau

Notice is hereby given that, on September 17, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the Interactive Advertising Bureau ("IAB")

has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: Interactive Advertising Bureau, New York, NY. The nature and scope of IAB's standards development activities are: to develop, promulgate and publish voluntary consensus standards for the Internet Advertising industry, using procedures that incorporate the attributes of openness, balance of interests, due process, and appeals process, and consensus. The IAB sets out to organize the industry to set standards and guidelines that make Interactive an easier medium for agencies and marketers to buy and capture value from advertising.

BILLING CODE 4410-11-M

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant to the National Cooperative Research and Production Act of 1993—IPC—Association Connecting Electronics Industries

Notice is hereby given that, on September 14, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), IPC—Association Connecting Electronics Industries ("IPC") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: IPC—Association Connecting Electronics Industries, Bannockburn, IL. The nature and scope of IPC's standards development activities are: design and performance standards for all types of interconnections, including printed wiring boards, flexible circuits, flat cable and discrete wiring devices. In addition, IPC develops standards for materials used in these products. Also, IPC is involved in standards for computer-aided technology, used to define electronic description. IPC is therefore also involved not only in the development of product standards, but in standardization and in guidelines
