

open riding (no trails) on U.S. Army Corps of Engineers land, and 108 miles on the ANF. Ohio offers (116) miles of ATV trail (Wayne National Forest). New York has no public ATV trails.

The ANF has offered OHV trails since the late 1970s. ATVs were developed in the 1980s and sales in Pennsylvania significantly increased with time (registered ATVs in Pennsylvania number approximately 180,000, unregistered exceeds approximately 485,000). Pennsylvania leads the eastern United States in ATV sales and ranks third nationally. Demand for more OHV trail miles on the forest is high.

ANF personnel have observed sharp increases in ATV riding over the last decade. The ANF Recreation Strategy (2002) identified ATV riding as the fastest growing recreation activity on the forest. The 1986 ANF Forest Plan lists a goal of 350 miles of summer motorized ATV/OHM trails by 2006. The current trail system totals 108 miles. There are five separate trails within four Intensive Use Areas (IUAs) throughout the forest. The Forest Plan limits designation of summer-motorized trails to the five IUAs, which encompass approximately 20 percent of the ANF's land base.

The USDA Forest Service identified the Marshburg/Stickney IUA as a priority for managing ATV recreational opportunities to meet the growing demand while assuring protection of natural resources. The existing 10.8-mile Willow Creek ATV Trail is located within this IUA. It is classified as "More Difficult," which is recommended for intermediate riders. The trail was not designed for riders of various skill levels and does not provide a full day riding opportunity. A contract trail assessment completed in 2000 by Trails Unlimited of Arcadia, California, determined that the Marshburg/Stickney IUA had the capability of providing a multiple mile trail system.

The proposed project would be a cooperative effort, made possible by a 2003 is being made possible through a multiple partnership grant agreement from the Pennsylvania Department of Conservation and Natural Resources to McLean County and administered by the U.S. Forest Service. Partners are looking forward to the expected economic development that this project should provide to the local communities.
