Abstract: The North Atlantic Treaty Organization (NATO) initiated its Advanced Study Institutes Program in 1958 modeled after a small number of very successful summer science “courses” that were held in Europe and that sought to rebuild Europe's science strength following World War II. The goal was to bring together both students and researchers from the leading centers of research in highly targeted fields of science and engineering to promote the “American” approach to advanced learning, spirited give-and-take between students and teachers, that was clearly driving the rapid growth of U.S. research strength. Today the goal remains the same; but due to the expansion of NATO, each year an increasing number of ASIs are held in NATO Partner Countries along with those held in NATO Member Countries. In the spirit of cooperation with this important activity, the Foundation inaugurated in 1959 a small program of travel grants for advanced graduate students to assist with the major cost of such participation, that of transatlantic travel. It remains today a significant means for young scientists and engineers to develop contact with their peers throughout the world in their respective fields of specialization.

The Advanced Study Institutes (ASI) travel awards are offered to advanced graduate students, to attend one of the
