

have the same characteristics, and IEX is not proposing to charge a higher fee for a “high performance” alternative.

The Exchange also does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because all Members (and their Service Bureaus) are entitled to five free Order Entry Ports and subject to the same low, cost-based fee for additional Order Entry Ports. While different total fees would be assessed depending on the number of Order Entry Ports a Member (or Service Bureau) requests, these different fees are not based on the type of Member requesting the Order Entry Port(s) but on the number of such ports the Member (or Service Bureau) requests, and each Member (or Service Bureau) can determine the number of such ports to reserve. Further, providing five free Order Entry Ports is designed to avoid creating barriers to entry for smaller Members, thereby promoting intramarket competition. In addition, even Members subject to relatively higher fees for more Order Entry Ports will still be subject to a relatively low aggregate fee (and significantly less than competing exchanges, as described above) and thus the proposed fee will not operate as a barrier to entry for such Members or impose a significant business cost burden on such Members relative to their levels of business activity. Finally, as described in the Purpose section, the proposed fee change is designed to assist the Exchange in complying with its Reg SCI compliance obligations to have levels of capacity adequate to maintain IEX’s operational capability and promote the maintenance of fair and orderly markets, thereby promoting both intermarket and intramarket competition by enabling IEX to support a robust trading environment for its Members and compete with other equities venues.
