SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Puerto Rico Highway & Transportation Authority (PRHTA), will prepare an environmental impact statement (EIS) on a proposal for improvements to the Hatillo-Aguadilla Northwest Corridor in the Commonwealth of Puerto Rico. The proposed project starts at PR-22/PR-2 intersection in the municipality of Hatillo, and ends at State Road PR-2 between kilometers 128.0 and 130.0 in the municipality of Aguadilla for a total length of approximately 45 kilometers.

The main goals of the Northwest Corridor project are: (1) Complete an expressway from San Juan to Aguadilla; (2) provide a more efficient system linkage in the study corridor; (3) alleviate local congestion on PR-2 in the municipalities of Hatillo, Camuy, Quebradillas, Isabela, Moca, and Aguadilla; (4) reduce travel time in at least 20% from Hatillo to Aguadilla; (5) improve traffic safety conditions from Hatillo to Aguadilla; (6) reduce the vehicle operating and maintenance costs of vehicle owners using the route; (7) reduce vehicle air emissions; and (8) promote the socioeconomic development of the northwest region of Puerto Rico.

Alternates under consideration include but are not limited to the following: (1) Taking no action; (2) widening the existing four-lane and at grade intersections to six-lanes and intersection overpasses at State Road PR-2; (3) constructing a four-lanes, limited access highway on new location; (4) and (5) constructing four-lanes, limited access highway segments on two new locations in combination with widening the existing four-lane and at grade intersections to six-lanes and intersection overpasses on other State Road PR-2 segments; (6) Dynamic Toll Lanes at State Road PR-2 from Hatillo to Aguadilla and constructing a four lanes limited access highway on the Aguadilla segment. The EIS will be developed in accordance with 23 U.S.C. 139, 23 CFR 771, and 40 CFR 1500-1508.

Public involvement will occur throughout the development of the environmental studies and the EIS. These documents will be made available for review and comments by federal and

state resource agencies and the public. Specific efforts to encourage involvement by, and solicit comments from, minority and low-income populations in the project study area will be made. A series of public information meetings will be held during the project study. In addition, a public hearing will be held after the completion of the Draft EIS. Public notice will be given as to the time and place of all public information meetings and hearings.

Inquiries related to the Hatillo-Aguadilla Northwest Corridor Project EIS can be sent to FHWA at the address provided above or at <http://www.corredornoroeste.com>. To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties.

The EIS process will conclude with a Record of Decision selecting either the no build alternative or a preferred alternative.

Abstract: Some older drivers have difficulty navigating to unfamiliar places. As a result, they may restrict their driving thereby decreasing their quality of life or attempt to drive and potentially encounter difficulties including becoming lost and risking injury or death. A number of electronic devices have been advanced as means to prolong older adults' driving careers. These include electronic navigation systems (ENSs), which could aid older drivers through freeing cognitive resources otherwise needed for wayfinding. It is possible, however, that these systems may increase driver workload because they cause a distraction or select a route that is different than the driver expects. The purpose of the study is to document differences in older adults' driving performance while they drive to familiar destinations, unfamiliar destinations using paper directions, and unfamiliar
