NUCLEAR REGULATORY COMMISSION

Licensing Support System Advisory Review Panel

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of renewal of the Charter of the Licensing Support Network Advisory Review Panel (LSNARP).

SUMMARY: The Licensing Support System Advisory Review Panel was established by the U.S. Nuclear Regulatory Commission as a Federal Advisory Committee in 1989. Its purpose was to provide advice on the fundamental issues of design and development of an electronic information management system to be used to store and retrieve documents relating to the licensing of a geologic repository for the disposal of high-level radioactive waste, and on the operation and maintenance of the system. This electronic information management system was known as the Licensing Support System (LSS). In November, 1998 the Commission approved amendments to 10 CFR Part 2 that renamed the Licensing Support System Advisory Review Panel as the Licensing Support Network Advisory Review Panel.

Membership on the Panel continues to be drawn from those interests that will be affected by the use of the LSN, including the Department of Energy, the NRC, the State of Nevada, the National Congress of American Indians, affected units of local governments in Nevada, the Nevada Nuclear Waste Task Force, and a coalition of nuclear industry groups. Federal agencies with expertise and experience in electronic information management systems may also participate on the Panel.

The Nuclear Regulatory Commission has determined that renewal of the charter for the LSNARP until December 9, 2006 is in the public interest in connection with duties imposed on the Commission by law. This action is being taken in accordance with the Federal

Advisory Committee Act after consultation with the Committee Management Secretariat, General Services Administration.

SUPPLEMENTARY INFORMATION:

Draft Report Entitled, "Evaluation of Loss of Offsite Power Events at Nuclear Power Plants: 1986-2003"

This report is an update of two previous reports analyzing loss of offsite power (LOOP) events at U.S. commercial nuclear power plants. LOOP data over the period 1986-2003 were collected and analyzed. Frequency and duration estimates for critical and shutdown operations were generated for five categories of LOOPS: plant centered, switchyard centered, grid related, severe weather related, and extreme weather related. Overall, LOOP frequencies during critical operation have decreased significantly in recent years, while LOOP durations have increased. Various additional topics of interest were also addressed. These topics include potential effects of deregulation, seasonal impacts on LOOP frequencies, consequential LOOPS and others. Finally, additional engineering analyses of the LOOP data were presented. This information is needed in probabilistic risk assessment models of U.S. commercial nuclear power plants to accurately model current risk from LOOP and associated station blackout scenarios.

The NRC is seeking public comment in order to receive feedback from the widest range of parties and to ensure that all information relevant to developing this document is available to the NRC staff. This document is issued for comment only and is not intended for interim use. The NRC will review

public comments received on the document, incorporate suggested changes as necessary, and issue the final report for use.

Dated at Rockville, Maryland, this 13th day of December, 2004.

For the Nuclear Regulatory Commission.

Charles E. Ader,

Director, Division of Risk Analysis and Applications, Office of Nuclear Regulatory Research.

RAILROAD RETIREMENT BOARD

Proposed Collections; Comment Request

Summary: In accordance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) publishes periodic summaries of proposed data collections. The information collections numbered below are pending at RRB and will be submitted to OMB within 60 days from the date of this notice.

Comments Are Invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

1. Title and Purpose of Information Collection

Railroad Separation Allowance or Severance Pay Report; OMB 3220-0173

Section 6 of the Railroad Retirement Act provides for a lump-sum payment to an employee or the employee's survivors equal to the Tier II taxes paid by the employee on a separation allowance or severance payment for which the employee did not receive credits toward retirement. The lump-sum is not payable until retirement benefits begin to accrue or the employee dies. Also, section 4(a-1)(iii) of the Railroad Unemployment Insurance Act provides that a railroad employee who is paid a separation allowance is disqualified for unemployment and

sickness benefits for the period of time the employee would have to work to earn the amount of the allowance. In order to calculate and provide payments, the Railroad Retirement Board (RRB) must collect and maintain records of separation allowances and severance payments which were subject to Tier II taxation from railroad employers. The RRB uses Form BA-9 to obtain, on a quarterly basis, the information needed from railroad employers concerning the separation allowances and severance payments made to railroad employees and/or the survivors of railroad employees. All reports contain a one-line entry for each such payment or adjustment. Completion is mandatory. Responses are requested quarterly. The RRB proposes no changes to Form BA-9.

The estimated annual respondent burden is as follows:

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form #	Annual responses	Time (min)	Burden (hrs)
BA-9	2,030	75	2,537

2. Title and Purpose of Information Collection

Representative Payee Parental Custody Monitoring; OMB 3220-0176

Under section 12(a) of the Railroad Retirement Act (RRA), the Railroad Retirement Board (RRB) is authorized to select, make payments to, and to conduct transactions with, a beneficiary's relative or some other person willing to act on behalf of the beneficiary as a representative payee. The RRB is responsible for determining if direct payment to the beneficiary or payment to a representative payee would best serve the beneficiary's interest. Inherent in the RRB's authorization to select a representative payee is the responsibility to monitor the payee to assure that the beneficiary's interests are protected. Triennially, the RRB utilizes Form G-99d, Parental Custody Report, to obtain information needed to verify that a parent-for-child representative payee still has custody of the child. One response is required from each respondent. The RRB proposes no changes to Form G-99d.

The estimated annual respondent burden is as follows:

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form #(s)	Annual responses	Time (min)	Burden (hrs)
G-99d	1,230	5	103

Additional Information or Comments: To request more information regarding any of the information collections listed above or to obtain copies of the information collection justifications, forms, and/or supporting material, please call the RRB Clearance Officer at (312) 751-3363 or send an e-mail request to Charles.Mierzwa@RRB.gov. Comments regarding the information collections should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611-2092 or send an e-mail to Ronald.Hodapp@RRB.gov. Written comments should be received within 60 days of this notice.
