SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for renewal of an approved information collection. The Merchant Marine Act of 1936, as amended by Public Law 91–469 and Public Law 99–514, provides for the administration of a Capital Construction Fund (CCF) Program by NOAA’s National Marine Fisheries Service (NMFS). The law requires that applicants enter into formal Agreements with the Secretary of Commerce. The Agreement allows the fishermen to defer taxable income from operation of their fishing vessels if the money is placed into an account to fund the construction, reconstruction, or replacement of a fishing vessel. The program requirements are detailed at 50 CFR part 259. The Agreement is a contract between the Secretary of Commerce and the Agreement holder specifying the obligations of each party. Schedule A specifies the vessel which earned the income which is eligible for deposit in to a CCF account. Schedule B specifies the construction, acquisition, or reconstruction objectives planned under the Agreement. The Certificate of Construction/Reconstruction certifies the total cost at completion of Schedule B objectives.

Under a CCF Agreement, the participant cannot deposit more than the amount specified at 46 U.S.C. 53505. NMFS must approve any withdrawals made before they take place. It is essential that a reasonably detailed record be kept of each participant’s deposit/withdrawal activity. If withdrawn monies are not used for allowed purposes, the withdrawn amount (a nonqualified withdrawal) is considered income to the participant in the year withdrawn and taxed at the highest marginal tax rate for the entity involved.

Respondents will be commercial fishing industry individuals, partnerships, corporations and limited liability companies which entered into CCF agreements with the Secretary of Commerce. The information collected from applicants for the CCF Agreement (NOAA Form 88–14) is used to determine their eligibility to participate in the CCF Program. The information collected from agreement holders for the Certificate Family of Forms is used to identify their program eligible vessels, their program projects, to certify the cost of a project at completion and to determine the remaining tax basis of the qualified vessel. The information collected on the Deposit/Withdrawal Report (NOAA Form 34–82) is required to ensure that agreement holders are complying with fund deposit/

withdrawal requirements established in program regulations and properly accounting for fund activity on their Federal income tax returns. The information collected on the Deposit/Withdrawal Report must also be reported semi-annually to the Secretary of Treasury in accordance with Public Law 115–97.

II. Method of Collection

Electronically, and email.

III. Data

OMB Control Number: 0648–0041.

Form Number(s): 88–14, 34–82.

Type of Review: Regular submission [extension of a current information collection].

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision and extension of a current information collection.

The success of fisheries management programs depends significantly on the availability of fishery data. As part of this fishery data, the National Marine Fisheries Service (NMFS) requires groundfish fishermen in the trawl and non-trawl fisheries to complete a logbook (see 50 CFR 660.13). The logbook used is a standard format developed by the Pacific Fishery Management Council (Council) to collect information necessary to effectively manage the fishery on a coast-wide basis. The logbook collects haul or set-level effort data including time, location, gear type, target strategy, and estimated pounds of fish caught per set. Each logbook entry represents a single fishing trip.

NMFS contracts with the Pacific States Marine Fisheries Commission (PSMFC) to distribute and collect the logbook data. These data are used regularly by NMFS, the Council, the West Coast Groundfish Observer Program, NMFS Office of Law Enforcement, and the Coast Guard for fisheries management and enforcement.

Previously, the trawl logbook and non-trawl logbook information collections were separate (NMFS temp collection 0648–0804); this revision would merge the non-trawl logbook information collection into the trawl logbook information collection.

II. Method of Collection

The non-trawl logbook is a fully electronic collection utilizing an application operated by Pacific States Marine Fisheries Commission. The trawl logbook has both paper and electronic options, both administered by Pacific States Marine Fisheries Commission.
