[Project No. 2651-006, Indiana]

Indiana Michigan Power Company; Notice of Availability of Draft Environmental Assessment

April 10, 2000.

In accordance with the National Environmental Policy Act of 1969, and the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for a new license for the Elkhart Hydroelectric Project, and has prepared a Draft Environmental Assessment (Draft EA). The project is located on the St. Joseph River in the City of Elkhart, in Elkhart County, Indiana. No federal lands or facilities are occupied or used by the project. [Docket No. CP00-104-000]

Distrigas of Massachusetts Company; Notice of Intent To Prepare an Environmental Assessment for the Proposed Domac Vapor Recovery Project and Request for Comments on Environmental Issues

April 10, 2000.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the construction and operation of vapor recovery facilities proposed by Distrigas of Massachusetts Company (DOMAC) in Everett, Massachusetts.¹ These facilities would recover natural gas vapor vented to the atmosphere during liquefied natural gas (LNG) cargo transfer operations. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

Summary of the Proposed Project

DOMAC states that its existing vapor handling system adequately recovers the natural gas vapor that results from LNG storage. However, during cargo transfer, additional vapor is produced, causing approximately 18,000-23,000 thousand standard cubic feet (Mscf) of each LNG cargo to be vented to the atmosphere in order to maintain design pressure in the LNG tanks. DOMAC seeks to recover this additional vapor (approximately 830,000 Mscf per year) by installing vapor recovery facilities consisting of a turboexpander-driven compressor, a hot water pump and heat exchanger, and associated meters and interconnecting piping.

Construction of the proposed facilities would occur completely on DOMAC's existing 35-acre LNG plant site. The general location of the project facilities is shown on figure 1.²

¹ DOMAC's application was filed with the Commission under Section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.
