Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate forms of information technology. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: Under the claims procedures in 40 CFR part 307 of the National Contingency Plan (NCP), a party must obtain EPA approval to take response actions, and subsequently, to make a claim for reimbursement from the Hazardous Substance Superfund. The forms used for these purposes are: (1) Application for Preauthorization of a CERCLA Response Action and (2) Claim for CERCLA Response Action. Both forms are in need of reinstatement and, once approved, will be publicly available on EPA's website and may be submitted to EPA via email.

Form Numbers: OMB Control Number 2050-0106; EPA Form Numbers 2075-3 and 2075-4;

Respondents/affected entities: persons seeking preauthorization and subsequent reimbursement of claims for necessary costs incurred for response actions; States or political subdivisions subject to an agreement reached pursuant to section 122(b)(1) of CERCLA.

Respondent's obligation to respond: required to obtain or retain a benefit per CERCLA 111(a)(2) and 112 and 40 CFR part 307.

Estimated number of respondents: Two (annually).

Frequency of response: Only occurs when entity seeks pre-approval or claim reimbursement.

Total estimated burden: 161 hours (per year). Burden is defined at 5 CFR 1320.03(b). This includes the submission of one pre-authorization form from one respondent (estimated at 110 hours) and one claim reimbursement form submitted by one respondent (estimated at 51 hours).

Total estimated cost: \$11,828.67 (per year), which includes \$0 annualized capital or operation & maintenance costs. This includes the estimated cost of submission of one pre-authorization form from one respondent (estimated at \$8,081.70) and one claim reimbursement form submitted by one respondent (estimated at \$3,746.97).

Changes in the estimates: There is a change in the total estimated respondent burden compared with the ICR previously approved by OMB. Respondent burden estimates have not been updated since the 1990s. Fewer entities have requested this authority over the past three years than in the past. The internet and other computer-based tools for information management reduces the amount of time needed to compile requested information.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Surface Coating of Metal Coil (40 CFR part 63, subpart SSSS) were promulgated on June 10, 2002, and most recently amended on February 25, 2020. These regulations apply to existing facilities and new facilities that are major sources of hazardous air pollutants (HAP) at which a coil coating line is operated. A coil coating line is a process in which special equipment is used to apply an organic coating to the surface of metal coils; the affected source at each plant site is the collection of all coil coating lines at the site. The provisions of this subpart do not apply to coil coating lines that are part of research or laboratory equipment or coil coating lines on which at least 85 percent of the metal coil coated, based on surface area, is less than 0.15 millimeters (0.006 inches) thick, unless the coating line is controlled by a common control device. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart SSSS.

Form Numbers: 5900–0526.

Respondents/affected entities:

Facilities engaged in metal coil surface coating.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart SSSS).

Estimated number of respondents: 48 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 16,200 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$2,220,000 (per year), which includes \$166,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 638 hours in the total estimated respondent burden compared

with the ICR currently approved by OMB. The previous burden estimate assumed 21 facilities would conduct performance tests in year three of the rulemaking ICR, assumed respondents would incur burden to revise record systems due to the amendments, and to become familiar with the EPA's CEDRI for electronic reporting. This ICR reflects the ongoing burden for sources to comply with periodic testing requirements every five years and assumes respondents will not incur additional burden for revising record systems due to the previous rule amendments or for familiarization with CEDRI.

Director, Information Engagement Division.
