SUPPLEMENTARY INFORMATION:

I. Abstract

Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), NOAA is responsible for management of the Nation's marine fisheries. In addition, NOAA must comply with the United States' obligations under the Atlantic Tunas Convention Act (16 U.S.C. 1801 *et seq.*). NOAA Fisheries collect information via dealer reports to monitor the U.S. catch of tuna in relation to the quota, thereby ensuring

that the United States complies with its international obligations to the International Commission for the Conservation of Atlantic Tunas (ICCAT). Provisions of the domestic regulations are also monitored through this collection of information, such as compliance with closures, fishing seasons, and subquotas by gear type and/or user group. This information provides the catch data necessary to assess the status of tuna resources. Assessments are conducted and presented to ICCAT annually. The data provide, in part, the basis for ICCAT management recommendations that become binding on member nations. In addition, dealer reports provide essential information for domestic management policy and rule-making. This collection also includes imports of Pacific bluefin tuna.

II. Method of Collection

Dealers who buy, sell, or receive for commercial purposes any large medium or giant size class Atlantic bluefin tuna are required to report all transactions to NOAA Fisheries via daily and biweekly reporting forms. These forms collect certain information for each Atlantic bluefin tuna that is sold at landing. Dealers who purchase any other types or sizes of Atlantic tunas, or Pacific coast dealers who export or import bluefin tuna, are required to submit biweekly reports only. Dealers must affix a tag to the tail of each bluefin tuna, record these tag numbers to the label of any packages of tuna parts to be transported for domestic use or export. Anglers who catch giant or large-medium size class Atlantic bluefin tuna must also submit daily reports.

III. Data

OMB Number: 0648-0239.

Form Number: NOAA 88-144.

Type of Review: Regular submission.

Affected Public: Business or other for-profit organizations (tuna dealers), individuals or households.

Estimated Total Annual Burden Hours: 1,468.

Estimated Total Annual Cost to Public: \$1,096.

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information

is still necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 13, 2002.

DEPARTMENT OF COMMERCE

[I.D. 081402B]

Submission for OMB Review; Comment Request

The Department of Commerce has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Gear-Marking Requirements for Atlantic Large Whale Take Reduction Plan.

Form Number(s): None.

OMB Approval Number: 0648-0364.

Type of Request: Regular submission.

Burden Hours: 2,572.

Number of Respondents: 4,506.

Average Hours Per Response: 0.6 minutes.

Needs and Uses: Persons setting lobster trap or gillnet gear in specified areas of the Atlantic Ocean are required to mark their gear with one color designating the type of gear and the area where the gear is set. The shark gillnet fishery requires their gear to be marked with two color codes, one color designating the type of gear and the other designating the area where the gear is set. The designated areas are critical right whale habitat or areas where right whales are seen on a regular basis. The purpose of the requirement is

to obtain information on where large whales are becoming entangled in fishing gear and the type of gear responsible for the entanglement. The information helps NOAA to focus risk-reduction efforts on specific problem areas rather than broader overall requirements on the industry.

Affected Public: Business or other for-profit organizations, individuals or households.

Frequency: Third-party disclosure.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Paperwork Clearance Officer, (202) 482-3129, Department of Commerce, Room 6086, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at MClayton@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: August 13, 2002.
