Abstract: The Climate Pollution Reduction Grants (CPRG) program was established under section 60114 of the Inflation Reduction Act (IRA) signed on August 16, 2022. Through a competitive process, EPA anticipates awarding \$4.6B in CPRG implementation grants to States, municipalities, Tribes/Territories, and air quality management districts in 2024 to "facilitate the reduction of greenhouse gas air pollution." Grantees will be required to report projected greenhouse gas (GHG) emission reductions as well as changes in other air pollutants, both in general and specifically in low-income and disadvantaged communities (LIDAC). This information will be collected to ensure accurate projections of GHGs and other air pollutant emissions both in and outside LIDAC areas for projects being funded under the CPRG program.

It is expected that the CPRG program, along with other IRA programs, will be

required to demonstrate effective execution of the statutory responsibilities charged to EPA, as well as comply with any additional reporting requirements (e.g., Evidence Act, Justice40). These responsibilities necessitate standardized data collection from CPRG implementation grantees for the purposes of (1) determining the accuracy of calculations and analyses submitted by grantees, (2) assessing the compliance of grantees in performing tasks agreed to under the Terms and Conditions of CPRG implementation grants, and (3) applying information collected from CPRG implementation grantees for analytical use.

Form numbers: n/a.

Respondents/affected entities: CPRG Implementation Grant General Competition and Tribes/Territories Competition grantees.

Respondent's obligation to respond: Mandatory (to comply with CPRG grant Reporting Requirements/Terms and Conditions).

Estimated number of respondents: ~130.

Frequency of response: 1-year (General Competition) and final reports (General and Tribal Competitions).

Total estimated burden: ~47,133 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: ~\$2,905,406 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: Not applicable, no current ICR.

Director, Air Quality Policy Division.

FEDERAL COMMUNICATIONS COMMISSION**[OMB 3060-1048; FR ID 201372]****Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority****AGENCY:** Federal Communications Commission.**ACTION:** Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the

following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before April 8, 2024. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1048.

Title: Section 1.929(c)(1), Composite Interference Contour (CIC).

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions and state, local or tribal government.

Number of Respondents and Responses: 50 respondents; 50 responses.

Estimated Time per Response: 2 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 309(j).

Total Annual Burden: 100 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission will submit this expiring information

collection to the Office of Management and Budget (OMB) for approval of an extension request.

Under 47 CFR 1.929(c)(1) of the Commission's rules, any increase in the composite interference contour (CIC) of a site-based licensee in the Paging and Radiotelephone Service, Rural Radiotelephone Service, or 800 MHz Specialized Mobile Radio Service is a major modification of a license that requires prior Commission approval.

However, in February 2005, the Commission adopted and released final rules which amended section 1.929(c)(1) to specify that expansion of a composite interference contour (CIC) of a site-based licensee in the Paging and Radiotelephone Service—as well as the Rural Radiotelephone Service and 800 MHz Specialized Mobile Radio Service—over water on a secondary, non-interference basis should be classified as a minor (rather than major) modification of a license. Such reclassification has eliminated the filing requirements associated with these license modifications, but requires site-based licensees to provide the geographic area licensee (on the same frequency) with the technical and engineering information necessary to evaluate the site-based licensee's operations over water.

Secretary, Office of the Secretary.
